### Scope of Corporate Income Tax Study

This report presents a description of the Colorado corporate income tax based on returns filed during the fiscal year July 1, 1983 through June 30, 1984. Detailed statistical tables are presented in which the returns are classified by type, income stratum, tax liability, domicile, scope of market (intrastate and interstate), method of income apportionment, asset size and major industry category. The data show the distribution of the state income tax liability among the 34,883 corporations involved in some form of economic activity in Colorado. Other studies of this type were conducted in 1975, 1981 and 1983 <sup>1/</sup>.

### Number and Type of Returns

The sample survey for this study indicates that 41,853 returns were filed during the fiscal year July 1, 1983 through June 30, 1984 with the Department of Revenue.

Table A

## Number and Type of Colorado Income Tax Returns

<u>Corporations Required to File</u>	<u>Number of Returns</u>	<u>Percent Distribution</u>
<u>Subject to Tax</u>		
Taxable	19,303	46.12
Nontaxable	<u>15,580</u>	<u>37.23</u>
Total	34,883	83.35
<u>Not Subject to Tax</u>		
Inactive/nonoperating	940	2.25
Non profit/charitable	110	.26
Subchapter S Corporations	5,900	14.10
DISC <u>a/</u> & Investment		
Trusts	<u>20</u>	<u>.04</u>
Total	<u>6,970</u>	<u>16.65</u>
Total Returns Filed	41,853	100.00

a/ Domestic International Sales Corporation

As shown in Table A the number of firms subject to tax amounted to over four-fifths of the returns, while those not subject to tax accounted for less than one-fifth of the total returns. The exempt returns primarily represent business firms that were inactive or not operating during the tax year and small business corporations (Subchapter S Corporations) which elected to be taxed through their shareholders under the state individual income tax. Corporations not subject to tax are excluded from the detailed statistical tables and analysis presented in the remainder of this report.

The number of returns does not necessarily represent the total number of corporations. The tax laws permit a parent corporation to file a single consolidated return for an affiliated group of corporations. Also it is possible that a particular corporation filed more than one return during the

fiscal year. For example, firms electing to change their accounting periods are required to file a return for the short period between the close of the original tax year and the beginning of the new one. A firm also may have filed two returns during the same period if an earlier return was filed as the result of a granted extension beyond the normal due date when the later return was filed without an extension. In either case, there is not a duplication of tax data since the returns cover different time periods.

Of the 34,883 corporate returns subject to taxation, 19,303 or 55.3% were taxable returns; i.e., reported some amount of positive Colorado taxable income (profit), and therefore incurred an income tax liability. This compares with 52.7% in 1975, 53.6% in 1981 and 41.8% in 1983. In contrast, 15,580 returns or 44.7% were non-taxable returns with either zero or negative Colorado taxable income (loss) or a Colorado operating loss carryover which equaled or exceeded their taxable income. This group amounted to 47.2% in 1975, 46.4% in 1981 and 58.2% in the 1983 report. This shift reflects the impact of the economic recession as well as the effect of the Federal Economic Recovery and Tax Equity Acts, especially with regard to the accelerated cost recovery system.

#### Accounting Periods

The accounting periods covered by the returns tabulated in this report are based on either the calendar year or the fiscal year used by the firm for federal income tax purposes. Table B shows the distribution of the number and tax liability before tax credits of returns filed during the state fiscal year July 1, 1983 through June 30, 1984, classified by the month in which the corporations' accounting period ended.

Table B

Ending Month of Accounting Periods  
Colorado Corporate Income Tax Returns  
Filed in Fiscal Year 1984

Ending Month of Accounting Period	Tax Returns		Tax Liability

Total Returns Filed <u>a/</u>	34,883	100.0	\$100,730	100.0

a/ Sum of items may not equal total because of rounding.

#### Tax Credits

The most significant Colorado legislation affecting the state corporate income tax since the 1975 study has been the adoption of various income tax credits. The credits utilized by the firms covered in this report include a pollution control property tax credit, a new business facilities credit, an inventory property tax credit, an investment credit and a commercial energy credit. Other credits, which were insignificant in amount, were an impact assistance credit, a crop-livestock credit and a trash hauling certificate credit <sup>2/</sup>. Table C shows the number of returns which claimed tax credits and the amount of credit by type of credit.

Table C

Number and Type of Income Tax Credits

Filed in Fiscal Year 1984

	<u>Number of Returns</u>		<u>Amount of Tax Credits</u>
A. Dollar Amount in Thousands			
Pollution Control	40		\$ 1,112
New Business Facilities	449		1,234
Inventory Tax	4,324		11,161
Investment	11,391		\$12,485
Investment Recapture <u>a/</u>	<u>3,008</u>	14,399	<u>( 893)</u> 11,592
Commercial Energy		106	507
Other		<u>26</u>	<u>17</u>
Total		19,344	\$25,623
B. Percent Distribution			
Pollution Control		.2	4.3
New Business Facilities		2.3	4.8
Inventory Tax		22.4	43.6
Investment	58.9		48.7
Investment Recapture	<u>15.6</u>	74.5	<u>(3.5)</u> 45.2
Commercial Energy		.5	2.0
Other		<u>.1</u>	<u>.1</u>
Total		100.0	100.0

a/ Tax from recomputing prior year investment credit.

The pollution control credit and the new business facilities credit, by their nature, are limited in scope and thus are not widely used credits. As shown in Table C only 40 returns or 0.1 percent of the 34,883 returns subject to tax claimed the pollution control credit and 449 firms or approximately 1.3 percent of the returns claimed the latter.

The inventory property tax credit is also a credit directed toward a specific purpose and was claimed by 12.4 percent or all firms subject to tax.

The most important of the tax credits, both in numbers of returns and dollar amount was the investment tax credit which was utilized by over nearly one-third of the returns and accounted for nearly one-half of the total amount of credits claimed.

The newest of the credits is the commercial energy credit which was reported on 106 returns or 0.3 percent of the total corporations subject to tax.

The combined credits claimed amounted to \$26.4 million and represented a tax saving equivalent to 26 percent of the total tax liability. Utilizing the investment tax recapture (based on recomputing prior year investment credit) as a negative credit reduces the total credits claimed to \$25.6 million for a 25% reduction in tax liability.

#### Tax Rates

Graduated corporation tax rates to be phased in over a five year period began January 1, 1981. The reductions originally scheduled for 1983, 1984 and 1985 were delayed by subsequent legislation to 1986, 1987 and 1988. These rates are expressed as reductions from the statutory rate of 5%.

#### Tax Reduction Rates (%) From 5%

<u>Net Income</u>	<u>1981</u>	<u>1982</u>	<u>1986</u>	<u>1987</u>	<u>1988</u>
\$ 0 - \$ 25,000	1.0	1.0	2.5	3.0	3.5
\$ 25,000 - \$ 50,000	0.5	0.5	2.0	2.5	3.0
\$ 50,000 - \$ 75,000	0.0	0.5	1.0	1.5	2.0
\$ 75,000 - \$100,000	0.0	0.0	0.5	0.5	1.0
\$100,000 and over	0.0	0.0	0.0	0.0	0.0

The tax reduction translates into graduated corporation income tax rates as follows:

<u>Net Income</u>	<u>Tax Rates (%)</u>				
	<u>1981</u>	<u>1982</u>	<u>1986</u>	<u>1987</u>	<u>1988</u>
\$ 0 - \$ 25,000	4.0	4.0	2.5	2.0	1.5
\$ 25,000 - \$ 50,000	4.5	4.5	3.0	2.5	2.0
\$ 50,000 - \$ 75,000	5.0	4.5	4.0	3.5	3.0
\$ 75,000 - \$100,000	5.0	5.0	4.5	4.5	4.0
\$100,000 and over	5.0	5.0	5.0	5.0	5.0

The graduated corporate rates reduced tax liabilities by approximately \$2.7 million for the fiscal year ended June 30, 1982, \$3.6 million for fiscal 1983 and \$2.7 million for fiscal 1984.

Table D shows a comparison of the maximum corporate income tax rates in use by the various states at the time the returns covered by this report were being filed <sup>3/</sup>. As shown in this table, 5 states imposed no corporate income tax and 5 states had a lower rate than Colorado. Four other states had rates the same as Colorado and 36 states, including the District of Columbia, had a maximum rate higher than Colorado.

## Federal Legislation

Legislation at the federal level also has had an effect on the Colorado corporation income tax. Since Colorado corporate taxable income is determined, for the most part, by reference to federal taxable income <sup>4/</sup>, the income and deduction provisions of the Economic Recovery Tax Act of 1981 and the Tax Equity and Fiscal Responsibility Act of 1982 apply automatically in the determination of Colorado corporate taxable income. Based on information provided by the Office of Tax Analysis of the U.S. Treasury Department, it is estimated that the provisions of these acts, especially with regard to accelerated depreciation provided by the accelerated cost recovery system reduced Colorado income tax liability by approximately \$5.8 million for fiscal 1982, \$11.3 million for fiscal 1983 and \$20.5 million for fiscal 1984.

## Corporation Income Tax Trends

Tables E and G show the trend in corporate income tax liability since 1975 and the impact of federal and state legislation in the corporate area. In the absence of such legislation, Colorado corporate income tax liability would have increased since the 1975 study from \$48.8 million to \$123.9 million in fiscal 1984 for an average annual growth rate of 10.9%. With the legislative changes, the tax liability rose from \$48.8 million in 1975 to \$75.1 million in 1984 for an average annual rate of 4.9%

Tables F and G portray the trend of corporate tax revenue on a cash collections basis, which reflects cash paid with returns, estimated tax payments, audit and account payments and refunds due to overpayments. Net collections have increased from \$58.1 million in fiscal 1975 to \$85.0 million in fiscal 1984. This represents an average annual increase of 4.3%. Refunds

have increased substantially over this period of time partly due to tax credits, other legislation and in recent years large increases in carryback losses due to the economic recession. Refunds due to carryback losses generally amounted to less than \$2 million per year. In 1982, 1983 and 1984 however, the amounts rose substantially to \$9.4 million, \$15.9 million and \$20.5 million respectively.

1984	- 7.9	- 9.5	58.0
Average Annual Change:	10.9	4.9	4.3

Corporate income tax liabilities as a percentage of total state income tax liabilities (individual, corporate and fiduciary) after credits and tax law changes has decreased from 15.9% in 1975 to 10.2% in 1984. As a percentage of total net Revenue Department collections, corporate income tax collections have decreased from 7.3% to 4.2% during this same period of time. Also on a net cash collection basis, the corporate income tax amounted to \$58.1 million or 17.2% out of total income tax collections of \$338.6 million in 1975 whereas the respective amounts were \$85.0 million or 10.1% out of \$845.8 million for fiscal 1983/84.

As a component of the general revenue fund of the state <sup>5/</sup>, corporate taxes have declined from a high of about 23% of the general fund in fiscal 1950 to 8.1% in fiscal 1975 and to 4.9% in fiscal 1984.

Table H presents the trend of the various tax credits by type of credit since their inception. The large changes occur in the investment credit from \$1.9 million in fiscal 1980 to \$26.1 million in fiscal 1982 and \$11.6 million in fiscal 1984 and in the inventory credit from \$.3 million to \$6.0 million to \$11.2 million over the same period. These amounts represent some normal growth but to a large extent are due to changes in the percentages of credit allowed and to the time period in which the tax returns are received.

Table H

Corporation Income Tax Credits

\* \$25,000

<sup>1/</sup> \$50 for each new business facility employee and \$50 for each \$100,000 of new business facility investment located in a county with more than 50,000 population. If new business facility is located in county with less than 50,000 population, the credit amounts become \$100.

<sup>2/</sup> Investment tax credit is percentage of federal investment credit. 10% for 1979 returns, 25% for 1980 returns, 15% for 1981 returns, 10% for 1982 returns and after.

<sup>3/</sup> Tax credit for a percentage of property tax paid on inventories. 20% for 1979 returns, 40% for 1980 returns, 60% for 1981 returns and 100% for 1982 returns.

<sup>4/</sup> 30% of amount of property tax paid on pollution control property.

<sup>5/</sup> 10% of expenditures for energy conservation and 30% for renewable energy property expenditures made during tax years 1981 through 1986.

<sup>6/</sup> Net of investment credit recapture of \$.2 million in fiscal 1982, \$.8 million in fiscal 1983 and \$.9 million in fiscal 1984.

### Intrastate and Interstate Firms

Corporations doing business in other states as well as Colorado are classified as interstate corporations and as such generally determine their Colorado taxable income by apportioning part of their federal taxable income to Colorado by using either the two-factor or three-factor formula required by statute, or by some specific allocation method approved by the Executive Director of Revenue <sup>6/</sup>. Corporations which do not qualify for income apportionment are classified as intrastate corporations. Table I-1 shows the distribution of interstate and intrastate corporations subject to tax and their tax liabilities. This is broken down by the apportionment method for the interstate firms. Table I-2 shows the distribution of the tax credits by type of credit on the same basis.

While the intrastate firms represent about four-fifths of the returns filed, they account for only about one-third of the total tax liability and one-third of the tax credits. Conversely, the interstate firms while representing only about one-fifth of the total number of firms, accounted for two-thirds of the total tax liability and two-thirds of the tax credits.

### Domestic and Foreign Firms

For purposes of this report, a corporation was classified as domestic if the home office of the corporation was located within Colorado; those located outside Colorado were considered to be foreign corporations. When the returns are classified on this basis, the distribution roughly parallels that of the intrastate-interstate classification. For example, 95% of all domestic returns represented intrastate firms and conversely 80% of all foreign returns were from interstate firms. The distribution of the domestic and foreign returns by intrastate and interstate activity is presented in Table J-1. Table J-2 details the tax credits by this same classification.

### Distribution by Industry

Colorado is generally considered to be a service oriented economy in terms of employment, income and number of firms. This characterization, as shown in Tables K-1 and K-2, appears to be equally applicable to the corporate income tax sector when returns are analyzed on the basis of the major standard industrial code classification (SIC). Service industries as a group including wholesale and retail trade primarily consists of a relatively large number of small and medium sized firms.

The service categories accounted for over two-thirds of the returns but represented about two-fifths of the tax liability both before and after credits. Overall, the corporate agricultural sector continues to be the least significant sector accounting for less than 3% of the returns and less than 1% of the tax. In contrast, the manufacturing classification represented about 9% of the returns but accounted for nearly one-fourth of the tax liability and one-third of the tax credits.

### Distribution by Asset Size

The determinations of asset sizes of corporations were based on the total assets reported by the firms on their income tax returns. The reported assets are for the firm's overall operations. Tables L-1 and L-2 provide a distribution by broad asset classes of all returns subject to tax, both taxable and nontaxable, and give some indication of the relative significance of the various sized firms operating in Colorado.

a/ Sum of items may not equal total because of rounding.

b/ Total may exceed the number of firms claiming credits since some taxpayers claimed more than one type of credit.

As a parallel to the preceding analysis, the largest number of returns was filed by relatively small firms, those with assets of less than \$100,000. As a group they represented over two-fifths of the returns, but accounted for less than 5% of the total tax liability. At the other end of the spectrum, the largest firms, those with assets of \$100 million or more, represented only about 4% of the returns but generated nearly one-half the total tax liability and accounted for over one-half of the tax credits. In broader terms, if one considers a corporation with assets of \$1 million or more to be fairly large, such corporations represented less than one-fourth of the firms doing business in Colorado but were responsible for over four-fifths of the total tax liability and tax credits. Conversely, by this measure small and medium sized firms, those with assets less than \$1 million, accounted for nearly four out of every five returns but as a group were liable for less than one-fifth of the state tax and received about 13% of the tax credits.

#### Distribution of Returns by Taxable Income Classes

Ten Colorado taxable income classes used in this report, one of which is for nontax returns and nine are used to distribute the taxable returns. Several of the nine classes are designed to parallel the break points for the graduated income tax rates, i.e., taxable incomes to \$25,000, taxable incomes from \$25,000 to \$50,000, taxable incomes from \$50,000 to \$75,000, and taxable incomes over \$75,000. When the tax returns are classified by taxable income categories, it is clearly evident that a vast majority of corporations account for a very small portion of the state corporate income tax. Conversely, the major portion of the tax revenues are generated by a relatively small number of large corporations. The utilization of the tax credits follows the same distributional pattern.

As shown in Table M-1, the nontaxable returns as a group constituted 45% of all the corporations subject to tax. Among the taxable firms, nearly two-thirds of the corporations reported taxable profits less than \$25,000 and accounted for only 4% of the tax liability and 5% of the tax credits. In contrast, the firms in the highest classification with taxable incomes of \$500,000 or more represented less than 3% of the returns but were responsible for over 69% total tax liability and an equal percentage of the tax credits.

#### Distribution of Returns by Income and Asset Size

Tables N and O show the distribution of returns cross-classified by income classes and asset size and by income classes and major industry group. As expected, there is a marked correlation between size of income and asset size. In the nontax and the two lower strata of the taxable returns, more than half of the returns were small firms with assets less than \$100,000. In the next four income classes the majority of returns were filed by medium size firms with assets of \$100,000 to \$1 million, and in the top three income classes the majority of returns were by large firms. These relationships are similar to those of the previous studies.

As previously noted, the Colorado economy is service oriented and on the basis of number of firms these service industries dominate every taxable income class. For example, at income levels below \$25,000 the service categories represented approximately three-fourths of the returns, and in the classes between \$25,000 and \$500,000 they amounted to over three-fifths of the returns. In the largest taxable class, service oriented firms constituted approximately one-half of the returns. In contrast, the agricultural and

mining categories were quantitatively the least important in almost all categories. Since the 1981 study, the category of all other services remained fairly constant in relative significance at 43% of the firms in 1981 to 46% in 1983 and 45% in 1984. Manufacturing declined from 11% to 9% over the same time period.

As shown in Table P, when the number of returns and tax liabilities of intrastate and interstate firms are separately classified by income classes, the skewed distribution is markedly greater for the interstate firms than for those whose business activities were essentially limited to Colorado. For example, among the intrastate taxable firms, those in the four lowest strata with taxable incomes less than \$50,000 accounted for almost four-fifths of the taxable returns and one-fifth of the tax liability, whereas for the interstate firms the four lowest taxable income classes represented less than two-thirds of the returns and only 2% of the tax liability. At the other end of the distribution, less than 2% of the intrastate firms reported taxable incomes of \$500,000 or more and accounted for almost two-fifths of the intrastate tax liability, whereas nearly 10% of the interstate firms were in this top category representing over four-fifths of the interstate tax.

### Apportionment of Federal Taxable Income

Table Q compares the tax distribution of the interstate firms using the Colorado two-factor formula with those using the multistate compact three-factor formula for apportioning reported federal taxable income to Colorado.

Although the number of firms using the two-factor formula was approximately two-thirds as large as the number using the three-factor formula, the tax liability of \$33.4 million was 1.4 times larger than the \$24.6 million reported by the firms using the three-factor formula. After tax credits however, the net liability of the two-factor firms was only 1.1 times larger than the three-factor firms at \$21.9 million and \$20.3 respectively. Among the taxable firms using the two-factor formula almost two-thirds of the returns were in the four lowest taxable income classes (less than \$50,000) but accounted for less than 2% of the tax liability reported by the two-factor firms. Conversely the top 10% of the firms in the highest taxable income class (\$500,000 and over) were responsible for nearly nine-tenths of the tax liability for two-factor firms.

In the case of the three-factor firms, the tax concentration or skewed distribution is not quite as great. Here, the top 9% of the firms accounted for three-fourths of the tax liability, while those with less than \$50,000 taxable income accounted for about 3% of the multistate three-factor tax liability.

Table R shows the relative significance of the revenue, property and payroll factors in the apportionment of the modified federal taxable income to Colorado. Firms have the option of using either the Colorado two-factor formula or the multistate compact three-factor formula. For the taxable firms using the two-factor formula the revenue factor was significantly less important than the property factor accounting for only two-fifths of the apportioned federal income while the latter represented three-fifths. This ratio is similar to that found in the prior studies. For taxable firms using the three-factor formula, the revenue factor, again, accounted for two-fifths of the apportioned income while the remaining three-fifths was equally divided between the property and payroll factors. On a combined weighted basis the property factor was the most significant and the payroll factor quantitatively the least important.

With regard to the nontaxable two-factor firms, the property factor, again, was more important accounting for nearly three-fifths of the apportioned income. In the case of the multistate nontaxable firms, the payroll factor was the most significant representing nearly half of the factors.

## Derivation of Taxable Income

The derivation of Colorado taxable income is presented in Table S <sup>6/</sup>. The firms reporting positive Colorado taxable income reported federal taxable income (profits) of \$78.1 billion on their overall company operations. Adjustments for differences between federal and state tax law reduced this amount to \$74.8 billion. Interstate firms accounted for practically 99% or nearly all these modified profits.

The apportioned and allocated income reported by the interstate firms amounted to \$1.3 billion or less than 2% of their total modified federal income. For the intrastate firms, the income reported to Colorado is the same as their modified federal taxable income of \$783 million or 58% of that reported by the interstate firms. The total taxable income subject to Colorado tax adjusted for operating loss carryover of \$54 billion from previous years amounted to nearly \$2.1 billion or less than 3% of the total federal taxable income on all taxable returns.

The nontaxable returns, on the other hand, reported negative federal taxable income of nearly \$36 billion which when modified for tax code differences amounted to \$31.4 billion. Almost 98% of this negative federal taxable income was accounted for by interstate firms which attributed \$3.6 billion or 11% of their losses to Colorado. For the intrastate firms, the Colorado losses amounted to \$1.6 billion or 44% of that reported by the interstate firms.

In addition, the nontaxable firms reported Colorado operating loss carryovers of \$1.9 billion resulting in a total negative Colorado taxable income of \$3.9 billion or almost 11% of their total negative federal taxable income.

## APPENDIX A

### SUMMARY OF PROVISIONS OF THE COLORADO CORPORATE INCOME TAX

The Colorado corporate income tax is the result of the application of the corporate tax rates to Colorado net corporate income. Colorado net corporate income is the federal taxable income plus or minus certain modifications and, in the case of a corporation doing interstate business, after apportionment and allocation under provisions of either the Colorado Income Tax Act <sup>1/</sup> or the Multistate Tax Compact <sup>2/</sup>.

#### Filing Requirements

Every corporation, including Subchapter S corporations, doing business in Colorado or deriving income from Colorado sources is liable for filing corporation income tax returns with Colorado. Corporations which are exempt from filing federal income tax returns are also exempt from filing Colorado income tax returns. Insurance companies which are subject to the tax imposed on gross premiums <sup>3/</sup> are also exempt from the Colorado income tax.

#### Accounting Periods and Method

The corporation's accounting periods and method of reporting for Colorado income tax purposes must be the same as for federal income tax purposes.

#### Modifications of Federal Taxable Income

There are several modifications which increase federal taxable income for the purpose of computing state corporate income taxes. These include (1) the addition of municipal bond interest which is not specifically exempt from Colorado tax, (2) any federal net operating loss deduction claimed in

computing federal taxable income, (3) the amount of any Colorado income tax deducted, (4) depreciation claimed with respect to alternative energy devices if the cost of such devices is being claimed as a modification decreasing federal taxable income, and (5) amounts claimed for the pollution control property tax credit.

Modifications decreasing federal taxable income are (1) federal bond interest, (2) Colorado income tax refunds, (3) any amount included in federal taxable income by reason of the gross-up provisions of Section 78 of the Internal Revenue Code, (4) the cost of alternate energy devices, (5) any salary or wage expense not allowed as a deduction on the federal return per Section 280C of the Internal Revenue Code (relating to the federal new jobs credit), (6) the federal work incentive credit and the federal targeted jobs credit, (7) amounts not deducted in determining federal taxable income for free or subsidized ride sharing or mass transit arrangements, and (8) other miscellaneous differences such as percentage depletion on oil shale.

#### Modified Federal Taxable Income

After federal taxable income has been adjusted by the above modifications, the resulting amount is classified as "modified federal taxable income." The "modified federal taxable income" is the Colorado taxable income for those intrastate corporations not apportioning income, and it becomes the base for the apportionment of income by interstate corporations.

#### Apportionment of Income

Corporations doing business in more than one state may elect each year to apportion income either under the Colorado Income Tax Act or the Multistate Compact. Other apportionment methods are allowed with the approval of the

executive director of the Revenue Department. For the purpose of apportioning income, "doing business" in a state is defined for Colorado income tax purposes as having income arising from the activity of one or more employees located in that state or arising from the fact that real or tangible personal property is located in that state for business purposes. This definition applies equally in determining when a Colorado corporation is doing business outside of Colorado or when a foreign corporation is doing business in Colorado. The multistate compact provided that a corporation is deemed to be doing business in another state if that state has the authority to subject the corporation to an income tax or equivalent tax. These definitions of "doing business" in a state have been somewhat restricted by federal law <sup>4/</sup>.

A 1980 court case <sup>5/</sup> held that the Colorado corporate income statutes provide for the distribution and allocation of income and deductions by use of a combined report in order to ascertain the income attributable to an in-state business activity of the corporation involved in a unitary business operation, (i.e., when that portion of the business operation within Colorado is dependent upon or contributes to the operation of the business outside the state).

#### Apportionment Under the Colorado Income Tax Act

This method of apportioning income provides for a two-factor formula: a revenue factor and a property factor. The modified federal taxable income subject to apportionment is multiplied by the average of the revenue factor and the property factor.

Revenue Factor. The revenue or sales factor is a fraction whose numerator consists of the total gross receipts assignable to Colorado and the denominator is the entire gross receipts from all sources. The gross receipts assignable to Colorado consists of sales of goods, merchandise or property which are ultimately delivered in Colorado. Included as Colorado revenue are rents and royalties from real and tangible personal property located in Colorado, revenue from services rendered in Colorado, and gross proceeds from the sale of real and tangible personal property located in Colorado. Also included, if the corporation's commercial domicile is in Colorado, are dividend income, interest income, gains from the sale of intangible personal property, and patent and copyright royalties if the accounting procedures do not reflect the state of utilization of patent and copyright royalties.

Property Factor. The property factor is a fraction in which the numerator is the average value of the corporation's real and tangible personal property owned or rented in Colorado and the denominator is the average value of all the corporation's real and tangible personal property owned or rented. Property value is the average of the amounts at the beginning of the taxable year and the ending of the taxable year. Corporations may elect to value all property owned by the corporation at cost or at its adjusted basis for federal income tax purposes. Real property rented by the corporation is valued at eight times the net annual rent and tangible personal property is valued at three times the net annual rent. Net annual rent is the annual rent paid by the corporation less any annual rent received by the corporation from subrentals.

### Apportionment Under the Multistate Compact

This method of apportioning income provides for a three-factor formula: a revenue factor, a property factor, and a payroll factor. Public utilities and finance companies are not permitted to apportion income under provisions of the multistate compact. The modified federal taxable income subject to apportionment is multiplied by the average of the sum of the revenue, property and payroll factors to determine the total income apportioned to Colorado. Income which is directly allocated to Colorado is added to the income apportioned to Colorado to derive the Colorado taxable income.

Business and Nonbusiness Income. In order to determine the Colorado taxable income under the multistate compact, the various sources of income must be classified as either business or nonbusiness. Business income is defined as income arising from transactions and activities in the the regular course of the corporation's trade or business. Nonbusiness income is all income other than business income (eg, dividends, rents and royalties).

Allocation of Income. Only that income which is classified as nonbusiness income by the multistate compact is subject to allocation. The directly allocated income in the form of interest and dividends less directly or indirectly related expenses are allocated to that state where the principal place of business of the corporation is located. The nonbusiness income in the form of net rents, royalties and capital gains are allocated to the state where such property is located. Nonbusiness income from patents and copyrights are allocated to the state where utilized or, if accounting procedures do not reflect the state of utilization, to the state in which the corporation's commercial domicile is located.

Modified Federal Taxable Income Subject to Apportionment. All nonbusiness income less related expenses is subtracted from the modified federal taxable income if the corporation qualifies and elects to apportion income under the multistate compact. The result is the modified federal taxable income subject to apportionment.

Revenue Factor. The revenue factor is the same as under the two-factor formula except that the definition of sales varies somewhat. Sales are defined as all gross receipts of the corporation not directly allocated. Sales of tangible personal property are Colorado sales if the property is delivered or shipped to a purchaser within Colorado other than the U.S. government regardless of F.O.B. point, or other condition of sale, or the property is shipped from Colorado to the U.S. government, or if the corporation is not taxable in the state of the purchaser. Sales other than tangible personal property are Colorado sales if the income producing activity is performed in Colorado or if a greater proportion of the income producing activity is performed in Colorado based on costs of performance.

Property Factor. The property factor is the same as under the two-factor formula, except that rented tangible personal property is valued at eight times the net annual rent, and owned property must be valued at cost.

Payroll Factor. The payroll factor is a fraction, the numerator of which is the total compensation paid in Colorado during the tax period by the corporation and the denominator is the total compensation paid everywhere during the tax period. Compensation means wages, salaries, commissions and any other form or remuneration paid to employees for personal services.

Compensation is Colorado compensation if the individual's service is performed entirely within Colorado or if the service outside Colorado is incidental to that performed in this state and (1) the base of operations or control is in Colorado, or (2) the base of operation or control is not in any particular state but the individual's residence is in Colorado.

#### Other Apportionment Methods

Multistate Compact Option. If a corporation's activities in Colorado consist of selling and the corporation neither owns nor rents real or tangible personal property in Colorado, and if the gross sales in Colorado during the taxable year are \$100,000 or less, the corporation may elect to pay a Colorado tax computed on gross sales. The tax rate is 1/2 of 1% of the gross receipts from Colorado sales.

Special Methods. Where the allocation provided by the Colorado income tax act or the multistate compact does not clearly reflect Colorado income or is not realistic as compared to the net income of the corporation as a whole, the corporation, with approval of the executive director of the revenue department, may adopt some other method.

#### Colorado Taxable Income

The Colorado taxable income is that amount computed after adjusting for tax law modifications and allocation and apportionment methods if applicable. This is the amount which is subject to the income tax unless a Colorado net operating loss deduction is claimed.

The Colorado net operating loss deduction is computed in the same manner as the federal net operating loss deduction except that in the case of a corporation apportioning income, it is that part of the federal net operating loss, as modified, from Colorado sources. The Colorado net operating loss may

be carried back and forward for the same number of years as a federal loss<sup>6/</sup>. The Colorado taxable income is reduced by any Colorado net operating loss deduction before the Colorado tax is computed.

Rate of Tax

With the exception of corporations eligible and electing to file under the Multistate Compact option, every group, person or organization considered to be or taxed as a corporation for federal income tax purposes shall be a corporation for Colorado income tax purposes. A tax is levied for each taxable year on each corporation doing business in Colorado on its net income from Colorado sources at a 5% rate reduced as specified in the following tables.

(a) For taxable years beginning on or after January 1, 1981 but before January 1, 1982:

- Rate Reduction -			- Net Tax -		
Taxable Income		Reduction	Taxable Income		Reduction
Over	But Not Over		Over	But Not Over

\$	100,000.....	\$1500	\$	100,000.....	\$3500 plus 5% of excess over \$100,000

(d) For taxable years beginning on or after January 1, 1987 but before January 1, 1988:

- Rate Reduction -			- Net Tax -		
Taxable Income		Reduction	Taxable Income		Reduction
Over	But Not Over		Over	But Not Over	
\$	0.....\$ 25,000....	3%	\$	0.....\$ 25,000....	2%
\$	25,000.....\$ 50,000....	\$750 plus 2 1/2% of excess over \$25,000	\$	25,000.....\$ 50,000....	\$500 plus 2 1/2% of excess over \$25,000
\$	50,000.....\$ 75,000....	\$1375 plus 1 1/2% of excess over \$50,000	\$	50,000.....\$ 75,000....	\$1125 plus 3% of excess over \$50,000
\$	75,000.....\$100,000....	\$1750 plus 1/2% of excess over \$75,000	\$	75,000.....\$100,000....	\$2000 plus 4 1/2% of excess over \$75,000
\$	100,000.....	\$1875	\$	100,000.....	\$3125 plus 5% of excess over \$100,000

(e) For taxable years beginning on or after January 1, 1988:

- Rate Reduction -			- Net Tax -		
Taxable Income		Reduction	Taxable Income		Reduction
Over	But Not Over		Over	But Not Over	
\$	0.....\$ 25,000....	3 1/2%	\$	0.....\$ 25,000....	1 1/2%
\$	25,000.....\$ 50,000....	\$875 plus 3% of excess over \$25,000	\$	25,000.....\$ 50,000....	\$375 plus 2% of excess over \$25,000
\$	50,000.....\$ 75,000....	\$1625 plus 2% of excess over \$50,000	\$	50,000.....\$ 75,000....	\$875 plus 3% of excess over \$50,000
\$	75,000.....\$100,000....	\$2125 plus 1% of excess over \$75,000	\$	75,000.....\$100,000....	\$1625 plus 4% of excess over \$75,000
\$	100,000.....	\$2375	\$	100,000.....	\$2625 plus 5% of excess over \$100,000

Only one application of the rate reduction is allowed for a taxable year in the case of a controlled group of corporations as defined in Section 1563(a) of the Internal Revenue Code filing separate Colorado income tax returns. The reduction is to be allocated at the election of the group.

Example: Assume the Colorado net incomes of the ABC controlled corporate group for 1987 are as follows:

A Corporation	\$150,000
B Corporation	\$ 50,000
C Corporation	(\$ 90,000)(loss)

The total Colorado net incomes (excluding net losses) of the group is \$200,000 and the net reduction in tax would be \$2,375. The \$2,375 can be claimed by either corporation A or B or divided between them as they elect.

#### Tax Credits

The tax credits provide a direct offset against tax liability. These are a pollution control property tax credit, a new business facilities credit, an inventory property tax credit, an impact assistance credit, a crop-livestock credit and a trash hauling certificate credit.

#### Pollution Control Property Tax Credit

The pollution control property tax credit is 30% of the amount of property taxes paid on pollution control property certified as such by the Colorado Department of Health. The credit also applies to payments in lieu of taxes paid in Colorado. The amount of the credit which may be claimed against Colorado income tax is limited to the income tax liability for the tax year reduced by any new business facility credit claimed. The pollution control property tax credit applies to tax years beginning before January 1, 1983 and may be carried forward to the five succeeding tax years.

### New Business Facilities Credit

If the new business facility is located in a county with more than 50,000 population, the credit is \$50 for each new business facility employee and \$50 for each \$100,000 of new business facility investment. If the new business facility is located in a county with less than 50,000 population, the credit amounts become \$100 instead of \$50. The total credit is limited to 50% of the tax due on new business facility income.

An expanded business may qualify as a new business facility if the expansion exceeds \$1 million or if the expansion exceeds 100% of its investment in the original facility. To be eligible for the credit, the facility must be acquired on or after July 1, 1978 and prior to December 31, 1983.

### Inventory Property Tax Credit

For taxable years beginning on or after January 1, 1979, taxpayers are allowed a refundable credit in an amount equivalent to a percentage of the general property tax paid to a political subdivision of Colorado on freeport merchandise, stocks of merchandise and livestock. The percentage of property tax allowed as a credit is 20% for 1979, 40% for 1980, 60% for 1981, 80% for 1982 and 100% for 1983. As a result of a 1982 Constitutional amendment, inventories and livestock will not be assessed in 1983 and years thereafter for property tax purposes.

### Investment Tax Credit

The Colorado investment tax credit for a given year is the sum of the Colorado investment tax credit carried over from preceding taxable years, the investment tax credit for the current taxable year, and the investment tax

credit carried back from subsequent tax years. The credits are to be claimed in the order in which they were created with the oldest credit to be claimed first, the second oldest credit to be claimed next, etc.

For taxable years beginning prior to January 1, 1982, the Colorado investment tax credit was a percentage of what the federal investment tax credit would have been had the federal credit been computed in accordance with the provisions of Section 46 of the Internal Revenue Code as such section existed on January 1, 1979. This January 1, 1979 date was removed from the Colorado income tax statute for taxable years beginning on or after January 1, 1982. For these years the Colorado investment tax credit will be based on the federal investment tax credit for the same taxable year.

The Colorado investment tax credit is limited to \$5,000 plus 25% of the amount by which the tax liability exceeds \$5,000, except that for taxable years beginning in 1980 and 1981, the limitation on the credit was \$25,000 plus 70% of the amount by which the tax liability exceeded \$25,000.

Within such limitations, the provisions for Colorado investment tax credit are summarized below:

<u>Taxable Year Beginning In:</u>	<u>Amount of Credits:</u>
1979	10% of the tentative 1979 federal investment tax credit
1980	25% of what 1980 federal investment tax credit would have been under 1/1/79 rules
1981	15% of what 1981 federal investment tax credit would have been under 1/1/79 rules
1982 and later	10% of tentative current year federal investment tax credit

Unused investment tax credits may be carried back for three tax years, but not beyond January 1, 1979, and forward for seven tax years. In the case of a controlled group of corporations, the limitation amounts shall be apportioned among the members of the controlled group.

#### Investment Tax Credit Recapture

For any income tax year beginning on or after January 1, 1979, if any corporation is required to redetermine the credit allowed by Section 38 of the Internal Revenue Code due to the provisions of Section 47 of such code, such corporation must redetermine the Colorado investment credit for the same tax year. With respect to ACRS property acquired during a taxable year beginning on or after January 1, 1982 and prematurely disposed of or reclassified on or after May 26, 1983, the recapture shall be determined in accordance with the recapture percentage table contained in Section 47(a) of the Internal Revenue Code.

If such redetermination results in a reduction of the Colorado investment credit for such year or for any year to which credit was carried, such reduction shall constitute an increase in Colorado income tax for the year during which the disposition or reclassification of the nature of the property occurs, and the amount of any unused investment tax credit carryback or carryover must be recomputed as appropriate. Such increase in tax shall not be included as tax liability for purposes of computing the limitations on current year credits.

#### Commercial Energy Credit

The commercial energy credit is a commercial, industrial and agricultural credit equal to 10 percent of expenditures for energy property and thirty percent of expenditures for solar or wind energy property which is located in

Colorado during the taxable years 1981 through 1986. Energy property is as defined in Section 48(1)(3) of the Internal Revenue Code of 1954. The maximum expenditure for which credit will be allowed is \$1,250,000 for 1981, \$1,750,000 for 1982, and \$2,250,000 for each of the taxable years 1983, 1984, 1985 and 1986. Energy property consists of such as boilers, burners or other equipment which is designed to use fuel other than oil, natural gas or any product of oil and natural gas.

#### Impact Assistance Credit

This credit applies to income taxes imposed on income derived from new or expanded mining or milling operations for tax years beginning after January 1, 1981. The credit is equal to contributions made by the corporation prior to commencement of operations to local governments to assist in solving impact problems created by such operation. Each contribution shall be based on an agreement between the taxpayer and the unit of local government and may be claimed against its income tax liability during the first five years of operation.

#### Crop-Livestock Credit

A credit is allowed with respect to the value of crops or livestock contributed to charitable organizations during the taxable year. This credit applies to taxable years beginning on or after January 1, 1982 and may not exceed \$1,000 per year. This credit may not exceed any tax liability remaining after previous credits have been claimed. Unused credits may be carried forward as an offset against tax liability for up to five years.

Trash Hauling Certificate Credit

For income tax years beginning on or after January 1, 1980, a credit is allowed based on the acquisition costs of a certificate issued by the public utilities commission for serving the public by hauling waste products or other discarded materials to and from disposal sites if such certificate was acquired from any existing motor vehicle carriers engaged in such business. The amount of the credit for any give tax year shall not exceed one-fifth of the cost of the certificate. The total of such credit shall not exceed \$15,000 per certificate.

## APPENDIX B

### DESCRIPTION AND LIMITATIONS OF STATISTICAL SAMPLE

This study was based on a sample of Colorado corporate income tax returns filed with the Department of Revenue during the fiscal year July 1, 1983 through June 30, 1984. Amended returns and audit adjustments are not included in the sample. This appendix describes the sampling procedure and indicates the statistical reliability of the sample.

A total of 41,853 corporate income tax returns were filed during fiscal year 1984. Six strata were created based on the amount of state corporate income tax liability and these classes were sampled at rates ranging from one out of every 20 returns in the non-tax group to every return when the total liability exceeded \$10,000. This procedure yielded a sample size of approximately 5,900 returns. Information from each of these returns was transcribed to worksheets, entered onto a computer data file, and verified by a series of edit checks.

The coefficient of variation (standard deviation as a percentage of the mean) is a measure frequently used to judge the accuracy of a sample. The implication of this measure with respect to tax liability is that if one were to take 100 similar samples of these tax returns, in 95 percent of the samples the estimated value of the Colorado tax liability would be within 0.33 percent of the actual value of Colorado tax liability.

Colorado corporate income tax reported to the Department of Revenue amounted to \$98.7 million. The estimate based on this sample was \$100.7 million or a difference of 2.03 percent of the reported value. Table B-1 shows the statistical reliability of Colorado tax liability by each of the six selected tax strata.

TABLE B-1

STATISTICAL RELIABILITY OF THE COLORADO  
CORPORATE INCOME TAX BY TAX CLASS

<u>Tax Class</u>	<u>Number In Sample</u>	<u>Coefficient Of Variation</u>	<u>Estimated Tax Liability (\$000)</u>
\$ 0	779	0.00	\$ 0
\$ 1 to \$ 500	876	3.09	1,534
\$ 500 to \$ 1,500	794	1.72	4,246
\$1,500 to \$ 3,000	651	1.80	5,534
\$3,000 to \$10,000	1,372	1.13	10,671
Over \$10,000	<u>1,117</u>	<u>0.00</u>	<u>78,746</u>
Total	5,589	0.17	\$100,730

Note: Statistical measures compiled only for corporations subject to tax.
