ACKNOWLEDGMENTS

A comprehensive report such as the Colorado Statistics of Income would not have been possible without the support of many individuals.

The Revenue Department is very grateful for the unflagging support of Mr. Lyle Kyle, past director of the Legislative Council. This series of reports has been published as Legislative Council research publications over the years.

The conceptual seed for the Statistics of Income reports was developed by Dr. Reuben Zubrow, recently retired professor emeritus at the University of Colorado. His ideas have strongly influenced the course of taxation in Colorado.

This year's Statistics of Income reports are dedicated to Lyle and Reuben. Thank you for your many contributions over the years.

Dr. George Bardwell of the University of Denver was responsible for the sample design. Over the years this design has continued to yield extremely accurate results.

The Research and Statistics Section of the Department of Revenue is also grateful to the many sections within the Department who contributed to this project. Data entry of the tax returns was under the supervision of Luella Zaragoza, Sally Hastings, and Cindy Nardini. The sample selection programs were written and maintained by Paul Magee and Lowell Roberts of the Management Information Services Division. Without their assistance, this project would have been impossible.

INTRODUCTION

Since 1972, The Colorado Legislative Council has commissioned studies to report on the income tax structure of our state. This publication marks the eighth of this series concerning individual income taxes.

A sample data base of over 18,000 tax returns drawn from a universe of over 1.4 million returns constitutes the basis for this report. From the data collected from each return, distributional analyses of sources of income, deductions, tax liability, and tax credits are presented. Estimates of Colorado income tax law changes on tax collections are discussed.

The report summarizes the distribution of household adjusted gross income by planning regions, major counties, and major cities in Colorado.

The report is intended primarily for the Colorado Legislature and should be particularly useful to committees such as the Tax Policy Study Committee. It is also intended to be useful to the economist, researcher, demographer and planner. Inquiries regarding this report may be directed to the Research and Statistics Office of the Department of Revenue.

Section 1. RECENT INCOME AND TAX TRENDS

This section examines the relation between sources of income, adjustments to total income, modifications, deductions, and tax liability.

Perhaps the most significant observation is the large increase in number of tax returns filed during the past year. No growth from the previous fiscal year was observed in 1983 and 1.5 percent in 1984, the number of returns filed increased by 3.9 percent in 1985. The growth in tax returns has never tracked well with increases in employment levels (3.9% vs. 2.2% last year) so perhaps the differences can be ascribed to non-economic reasons. The Department of Revenue in the past year has pursued some fairly vigorous programs in enforcing income tax filing. The gap between Colorado wages reported by the United States Bureau of Economic Analysis and wages reported on Colorado income tax returns narrowed during the past year. This may be considered as supporting evidence that the Department's programs are working.

In any case, income reported on tax returns was up significantly during the past year and contributed to a healthy growth in income tax revenues.

Tables I-1, I-2, and I-3 present the major sources of income as reported on resident tax returns (full year plus part year returns only) during the past years.

TABLE I-1. MAJOR SOURCES OF INCOME
ON RESIDENT TAX RETURNS
Fiscal Year 1984

	Number of Returns	Percent of Returns Reporting	Colorado Income		
			Amount (millions)	Percentage Change from FY 19834	Percentage Distribution
Wage and Salaries	1,189,130	84.9	\$25,712.7	9.9	80.6
Net Property Income	923,746	66.0	\$ 4,978.5	14.3	15.6
Positive	810,003	57.8	5,968.2	7.6	18.7
Negative	113,743	8.1	989.7	-17.0	(3.1)
Business Income	227,343	16.2	\$ 1,176.5	23.2	3.7
Positive	154,426	11.0	1,577.5	22.3	4.9
Negative	72,917	5.2	401.0	-19.8	(1.2)
Farm Income	38,600	2.8	\$ (215.1)	-40.2	(0.7)
Positive	12,785	0.9	131.0	5.9	0.4
Negative	25,815	1.8	346.1	-24.7	(1.1)
Other Income	506,944	36.2	\$ 243.4	-29.3	0.8
Total Income	1,400,655	100.0	\$31,896.0	10.4	100.0

Wage and salary income increased 9.9 percent to \$25.7 billion in fiscal 1985. The average wage and salary reported increased from \$20,499 to \$21,623 per return, a rise of 5.5 percent.

Net property income consists of interest and dividends, taxable capital gains, rents, royalties, partnership income, pensions, and annuities. this component of income grew at a rate of 14.3 percent from the prior year. Interest income grew at a 16.5% rate, dividends at 6.7% and net capital gains at 43%. Rents and other property income declined by 12.3%.

Business income continued to increase at a healthy rate of 23.2 percent from the prior year.

Net farm income reported on Colorado income tax returns dropped to a negative \$215.1 million from a negative \$154 million the prior year.

Other income dropped to \$243.4 from \$344.2 million reported the prior year.

The sum of these income components totalled \$31.9 billion, an increase of 10.4 percent from the prior year. This increase is less than the 11.2 percent increase reported in Colorado adjusted gross income. Tables I-2 and I-3 summarize the sources of income and present the adjustments, modifications, and deductions for the last four fiscal years.

TABLE I-2. HISTORICAL COMPONENTS OF COLORADO
AGI AND DERIVATION OF TAXABLE INCOME
Resident Returns
(Dollar Amounts in Millions)

<u>Income and Deductions</u>	<u>Fiscal Years</u>

Tax Liability	\$ 596.8	\$ 634.5	\$ 701.6	\$ 867.3
Average Effective Tax Rate	4.81	4.83	4.94	5.45

Federal adjustments to total income formerly consisted largely of allowable business deductions. These adjustments have grown rapidly (currently at \$1.336 billion) because of two changes in federal tax law. The first of these is the deduction taken for payments to individual retirement accounts (IRA's). Data from the sample indicate that these contributions amounted to \$588 million during fiscal year 1985. The second federal adjustment is the deduction allowed to two earner households. These households are allowed to deduct ten percent of the smaller income up to a maximum of \$3,000. This benefit is designed to reduce the "marriage penalty" inherent in the federal tax rate structure. This deduction accounted for \$303 million on tax returns filed during fiscal year 1985. Colorado now adds this adjustment back to federal adjusted gross income (we had not done so for the prior two years of the two-earner credit) as the "marriage penalty" does not exist within Colorado's tax structure.

Federal adjusted income is simply total income minus federal adjustments. It amounted to \$30.6 billion during fiscal year 1985, an increase of 10.3 percent from the prior year.

Colorado modifications consist of adjustments to federal adjusted gross income specifically allowed by Colorado's statutes. The net adjustments amounted to \$1.428 billion. Key components include additions of PERA (\$67.9 million) and the two-earner deduction allowed at the federal level (\$303 million), and subtractions of U.S. government interest (\$175.4 million), the pension and annuity income exclusion (\$1,087.9 million), the child care expense (\$168.6 million), the Colorado interest exclusion (\$161.0 million), and the Colorado dividend exclusion (\$28.2 million).

TABLE I-3. HISTORICAL COMPONENTS OF COLORADO
AGI AND DERIVATION OF TAXABLE INCOME
Resident Returns
Percent Change from Prior Year

Income and Deductions	Fiscal Years		
	1983/82	1984/83	1985/84

Equals: Federal AGI	7.7	6.2	10.3
Less: Colorado Modifications	36.0	7.1	6.9
Equals: Colorado AGI	6.2	5.1	11.2
Less: Itemized Deductions	7.1	9.8	19.2
Standard Deductions	3.4	0.3	- 0.3
Exemption Value	8.4	0.1	4.5
Federal Tax Deductions	2.1	- 3.4	9.9
Equals: Taxable Income	6.0	8.1	12.2
Tax Liability	6.3	10.6	23.6

Colorado adjusted gross income is the difference between federal AGI and Colorado modifications (for purposes of this report, Colorado AGI is considered to be equal to zero when it is negative). Colorado AGI forms the basis on which all income distributions are presented. It grew at a slightly faster rate (11.2 percent) than total income as the additional modification of the two-earner deduction for the first year lowered the growth rate of net Colorado modifications.

Colorado deductions consist of an exemption allowance, an itemized or a standard deduction, and the federal income tax deduction. The personal exemption is granted to each taxpayer and to his or her dependents. Additional exemptions are granted to taxpayers age 65 or over, to taxpayers who are blind, and to dependents who are retarded. The basic exemption allowance was \$1,200 on 1984 tax year returns. A total of 3,282,468 exemptions for a value of \$3.837 billion was claimed on resident returns. This represents an increase of 4.5 percent

A taxpayer may claim either a standard deduction or itemized deductions. The basic value of the standard deduction was \$1,420 during the past year. It was claimed by 706,000 taxpayers for a total value of \$958 million. There was a decline of roughly 10,000 returns utilizing the standard deduction indicating a continuation of the trend to the use of itemized deductions.

Itemized deductions consist of medical expenses (beyond a threshold level), state and local taxes, interest expenses, charitable contributions, and miscellaneous deductions. Itemized deductions claimed on returns filed last fiscal year grew to \$5.732 billion, an increase of 19.2 percent from the prior year.

Colorado taxable income is the result of subtracting these deductions from Colorado adjusted gross income. It is calculated as zero when deductions exceed Colorado adjusted gross income. Taxable income on returns filed last year totalled \$15.924 billion.

Colorado tax liability is defined in two ways in this report. Gross normal tax liability is the result of applying the tax structure to taxable income (rate times base). Net normal tax liability is gross normal tax liability minus tax credits (rate times base minus credits). The latter concept is used most frequently in this report. Gross normal tax was \$867.3 million on resident tax returns. Net normal tax was \$828.8 million. These figures show substantial growth from the prior year but much of the growth resulted from the removal of a 1/2% tax credit built into Colorado's tax structure since 1963. A discussion of the impact of this revenue-raising measure can be found in Section III.

Section II. DISTRIBUTION BY INCOME CLASSES
AND PROGRESSIVITY OF THE TAX STRUCTURE

Table II-1 shows the distribution of the number of returns and adjusted gross income by fixed income classes for the last three years. As expected with increasing incomes, a higher share of total reported AGI is assumed by higher income classes over time. This is a natural result of having more taxpayers move up through the income brackets.

TABLE II-1. PERCENT DISTRIBUTION OF RESIDENT
TAX RETURNS AND SHARE OF TOTAL ADJUSTED
GROSS INCOME BY MAJOR INCOME CLASSES
Fiscal Years 1983, 1984, 1985

Adjusted Gross Income Classes	Number of Returns			Adjusted Gross Income		
	1983	1984	1985	1983	1984	1985
Under \$ 5,000	23.7	22.8	22.1	2.6	2.4	2.2
\$ 5,000 to \$15,000	29.3	28.7	27.7	14.8	14.0	12.6
\$15,000 to \$25,000	19.5	19.2	18.7	20.1	19.1	17.4
\$25,000 to \$50,000	22.7	23.6	24.3	40.9	41.3	40.1
\$50,000 and over	4.9	5.7	7.2	21.6	23.2	27.7
TOTAL	100.0	100.0	100.0	100.0	100.0	100.0

Table II-2 presents a percentile analysis of 4 key concepts: adjusted gross income, gross normal tax, net normal tax, and federal income tax. Percentile analysis is used to show the relative burdens assumed by different segments of the population. In this case, taxpayers have been divided into four groups of equal number (quartiles) on the basis of the magnitude of their adjusted gross income.

TABLE II-2. QUARTILE ANALYSIS OF RESIDENT RETURNS
 AGI, GROSS NORMAL TAX, NET NORMAL TAX, AND FEDERAL INCOME TAX
 Fiscal Years 1983, 1984, 1985
 (Dollar Amounts in Millions)

	Quartile 1			Quartile 2			Quartile 3			Quartile 4		
	1983	1984	1985	1983	1984	1985	1983	1984	1985	1983	1984	1985

Percentage Change	8.1	10.0	27.3	6.2	10.5	28.3	5.5	10.4	23.8	6.7	10.5	22.8
Net Normal Tax												
Amount	4.0	4.3	5.6	46.4	51.7	66.1	143.0	158.7	197.0	408.0	449.4	560.1
Percentage Share	0.7	0.6	0.7	7.7	7.8	8.0	23.8	23.9	23.8	67.8	67.7	67.6
Percentage Change	29.0	7.5	30.2	26.1	11.4	27.9	26.1	11.0	24.1	27.9	10.1	24.6
Federal Income Tax												
Amount	23.3	23.2	28.0	261.9	252.9	294.3	812.6	784.5	828.7	2,884.7	2,737.9	3,023.6
Percentage Share	0.6	0.6	0.7	6.6	6.7	7.0	20.4	20.7	19.9	71.2	72.1	72.4
Percentage Change	34.7	-0.4	20.7	6.5	-3.4	16.4	3.6	-3.5	5.3	2.7	-5.1	10.4

There were not any large shifts from last year. Perhaps the most significant observation concerns quartile four's share of adjusted gross income. It has increased 6/10 of one percent, while its share of gross normal tax has dropped 5/10 of one percent. This is due to a more rapid growth of deductions from adjusted gross income to arrive at taxable income.

Last year, the absolute amount of federal income tax paid for each quartile dropped. This was a result of the reduction in tax rates brought about by The Economic Recovery Act of 1981. Rates were also reduced in 1984 but not as drastically as in the prior three years. Therefore, the growth in income during the past year overcame the rate reductions to generate an increase in federal tax paid by Colorado residents.

Colorado's tax rate structure during the past year ranged from 3 percent to 8 percent. During the prior year, this range was from 2.5 percent to 8 percent. The difference is the result of removing a 0.5 percent rate credit in effect for the first 9 of Colorado's 11 tax brackets. Although the last two brackets did not experience an increase in marginal tax rate, their total tax liability was increased because the increases in the lower brackets are cumulative throughout the rate structure. The large percentage increases in gross normal tax observed in Table II-2 are the result of this tax law change. It will be discussed in greater length in Section III.

A progressive rate structure exists when higher levels of income are taxed at higher rates. A regressive rate structure exists when higher levels of income are taxed at lower rates. A proportional or flat rate structure taxes all income at the same rate. Because Colorado's tax rate schedule varies from 3 percent to 8 percent based upon magnitude of income, it has a progressive

structure. Obviously, the level of deductions claimed can affect the effective level of progressivity in a tax system. For example, higher income taxpayers tend to claim substantially higher levels of deductions which may reduce their taxable incomes to levels below that which the 8 percent rate becomes effective or reduce amounts of income subject to the maximum 8 percent rate.

The progressivity of Colorado's tax structure may be further observed by extracting data from the quartile analysis of Table II-2 and adding another factor, taxable income. Table II-3 shows both gross normal tax and net normal tax as a percentage of adjusted gross income and taxable income. The average effective tax rate using gross normal tax as a percentage of taxable income increases from 3.12 percent in the first quartile to 6.0 percent in the last quartile. This progressivity remains but is reduced slightly when net normal tax is examined as tax credits used by the upper income quartiles reduce their tax liability.

TABLE II-3. GROSS AND NET NORMAL TAX AS A
PERCENTAGE OF TWO INCOME MEASURES
Fiscal Year 1985

Quartile	Percentage of Adjusted Gross Income		Percentage of Taxable Income	
	Gross Normal Tax	Net Normal Tax	Gross Normal Tax	Net Normal Tax
1	0.64	0.64	3.12	3.12
2	1.89	1.85	3.89	3.81
3	2.68	2.60	4.86	4.71
4	3.34	3.17	6.00	5.70
TOTAL	2.92	2.79	5.45	5.20

Section III. IMPACT OF TAX LAW CHANGES

Due to the impetus of burgeoning surpluses in state revenues during the late seventies, Colorado could afford to enact a number of tax reduction measures; however, more recently, Colorado has faced deficit situations. In 1983, the state legislature took several steps to increase revenues. These actions are discussed within this section.

A. INDEXATION

In 1978, Colorado became the first state to adopt indexation. This was a move designed to stop or slow tax bracket creep -- the progression into higher tax brackets as incomes increased to keep up with the high rates of inflation at the time. Colorado has indexed its personal exemption, standard deduction, and rate brackets. The levels of indexation since 1978 are shown in Table III-1.

TABLE III-1. LEVELS OF STANDARD DEDUCTION,
PERSONAL EXEMPTION AND RATE BRACKETS

<u>Tax Year</u>	<u>Indexing Factor a/</u>	<u>Standard Deduction</u>	<u>Personal Exemption</u>	<u>Rate Bracket Size</u>	<u>Bracket Range b/</u>
1977 <u>c/</u>	--	\$1,000	\$ 850	\$1,000	\$0-\$10,000
1978	1.06	\$1,060	\$ 901	\$1,060	\$0-\$10,600
1979	1.07	\$1,134	\$ 964	\$1,134	\$0-\$11,342
1980	1.09	\$1,236	\$1,051	\$1,236	\$0-\$12,363
1981	1.08	\$1,335	\$1,135	\$1,335	\$0-\$13,352
1982	1.06	\$1,415	\$1,203	\$1,415	\$0-\$14,153
1983	1.00	\$1,415	\$1,203	\$1,415	\$0-\$14,153
1984 <u>d/</u>	1.00	\$1,420	\$1,200	\$1,420	\$0-\$14,150

- a/ Annual indexing factors are presented. Compounded rates are: 1979, 1.1342; 1980, 1.2363; 1981, 1.3352; and 1982 through 1984, 1.4153.
- b/ Marginal taxable incomes above upper limits shown are taxed at the maximum 8 percent rate.
- c/ 1977 was prior to indexation. It is given for comparison purposes.
- d/ The 1984 values for the standard deduction, personal exemption, and rate bracket size differ from the 1983 values as these amounts are now required to be rounded to the nearest \$10.

The fiscal impacts of indexation will be presented in two ways. First, the cumulative impacts of indexation over time are presented in Table III-2. Second, the legislature has exercised the option of altering the level of indexation from a statutory six percent. The impacts of these deviations for each of the years is presented in Table III-3.

TABLE III-2. IMPACT OF INDEXATION ON
COLORADO INDIVIDUAL INCOME TAX LIABILITY
(Millions of Dollars)

<u>Tax Year</u>	<u>Normal Tax Liability With Indexing</u>	<u>Estimated Normal Tax Liability Without Indexing</u>	<u>Difference</u>
1978	\$438.4	\$ 456.4	\$ 18.0
1979	\$492.7	\$ 532.6	\$ 39.9
1980	\$560.2	\$ 640.7	\$ 80.5
1981	\$602.7	\$ 722.5	\$119.8
1982	\$642.0	\$ 793.1	\$151.1
1983	\$715.2	\$ 873.6	\$158.4
1984	\$876.6	\$1,040.1	\$163.5

Table III-2 shows that Colorado taxpayers have received tax reductions amounting to \$731.2 million over the 7 years that indexing has been in effect. This is a reduction of 14.5 percent from the estimated unindexed tax liability during this period. Indexation's impact has continued to grow even though the indexation factor has not been increased recently because the impacts are cumulative over time.

Table III-3 shows the impact of legislative decisions to either increase or decrease the indexation factor from 6 percent. The state legislature may set the factor at whatever rate it desires but state budgeteers use it as a guideline in providing revenue estimates. Any changes from the 6 percent factor have thus historically been viewed as increases or decreases from the state budget. The "per percentage point" value of indexation has increased from \$3.0 million in 1979 to \$4.7 million in 1984. It increases due to a larger number of returns and the movement through the tax brackets.

TABLE III-3. IMPACTS OF DEVIATING
FROM SIX PERCENT INDEXING

<u>Tax Year</u>	<u>Actual Indexation Factor</u>	<u>Impact (Decrease)/Increase</u>
1979	7%	(\$ 3.0 million)
1980	9%	(\$10.4 million)
1981	8%	(\$ 7.9 million)
1982	6%	-----
1983	0%	\$26.7 million
1984	0%	\$28.2 million

Table III-4 presents the value of tax reductions attributable to indexation by major income class. Indexation is clearly more beneficial to lower income taxpayers. As such, it maintains and increases the progressivity of Colorado's tax structure.

B. INCOME TAX CREDITS

A number of tax credits have been enacted since 1979. They have been designed to provide tax relief to Colorado taxpayers and/or to help stimulate particular sectors of our economy. The legislature, in late 1983, repealed a long-standing tax credit in order to stave off an impending budget crisis. The impacts of the credits enacted in the past 5 years which reduced state revenues are presented in Table III-5.

	<u>\$135.4</u>	<u>\$130.4</u>	<u>\$39.9</u>	<u>\$37.3</u>	<u>\$36.9</u>

* Less than \$50,000

A general tax credit of 10%, 20%, and 16% against normal tax liability was in effect for tax years 1979 through 1981. The amounts which have been claimed since that time represent claims filed on delinquent and amended returns.

Colorado's energy credit was first effective for the 1980 tax year. It followed the federal tax credit in form and was intended to help energy consumers to reduce both their short and long term energy expenditures in an era of rising energy costs and to stimulate the infant energy conservation industry. A tax credit of 20 percent of the first \$2,000 of energy conservation expenditures and a tax credit of 30 percent of the first \$10,000 of expenditures for renewable energy (generally solar) property made up this program. The credits could be claimed for expenditures made through 1985. These credits totaled \$22.8 million in fiscal year 1985. Because the amount of credit claimed is limited to the amount of tax liability, the unused credit may be carried forward to future years. Of the \$22.8 million claimed during the past fiscal year, an estimated \$13.1 million had been carried over from prior tax years. It is estimated that there is at least an estimated \$10.9 million to be claimed in future tax years. This should be considered to be a future liability of the state.

The investment credit is intended to encourage private investment in new income producing assets in Colorado. Since 1979, this credit has been set as a percentage of the federal investment credit. Colorado individual taxpayers claimed \$8.1 million for this credit during the recent fiscal year.

The inventory tax credit was intended to offset the property tax assessed on inventories by local governments. This property tax is no longer effective, yet \$200,000 was claimed as a credit on delinquent returns and returns filed with an extension.

The heat credit was designed to offset the high cost of home heating for Colorado elderly and disabled citizens meeting certain income limitations. These taxpayers received \$4.4 million during the past year. The benefits have been declining over the last several years as incomes have risen which reduces eligibility and the allowable benefits.

How these tax credits have affected the progressivity of Colorado's tax structure has been documented in prior year reports of this series, so it will not be discussed again.

A tax credit which had been built into the statutory rate structure since 1963 was repealed effective with the 1984 tax year. This credit had the effect of reducing the tax rates by 1/2% in the first 9 taxable income brackets. As these impacts are cumulative through the brackets, the last two taxable income brackets also experience increased taxes. As a result of this law change, the tax rates range from 3 to 8 percent rather than 2 1/2 to 8 percent. The beginning tax for the last bracket is \$742.75 rather than \$679.65 under the old tax rate structure yielding a maximum increase of \$63.10 per taxpayer. The repeal of this tax credit yielded \$59.5 million to the state treasury during fiscal year 1985. Table III-6 shows the impact of this increase by major income class.

TABLE III-6. IMPACT OF THE REPEAL OF
THE 1/2 PERCENT CREDIT, ALL RETURNS
(Dollar Amounts in Thousands)

<u>Adjusted Gross Income Class</u>	<u>Number of Taxable Returns</u>	<u>Tax With New Rates</u>	<u>Tax With Old Rates</u>	<u>Average Increase</u>	<u>Average Percentage Increase</u>
Less than \$ 5,000	121,857	\$ 3,797	\$ 3,179	\$ 5	19.4
\$ 5,000 - \$15,000	353,141	69,945	60,880	26	14.9
\$15,000 - \$25,000	258,084	135,012	121,481	52	11.1
\$25,000 - \$50,000	340,382	368,753	342,129	78	7.8
\$50,000 and over	100,720	299,107	289,411	96	3.4
	<u>1,174,184</u>	<u>\$876,614</u>	<u>\$817,080</u>	<u>\$51</u>	<u>7.3</u>

As can be seen, the average impact of repeal of the 1/2 percent credit ranged from \$5, in the lowest category, to \$96 in the highest income bracket. At the same time, the average percentage increase was largest in the lowest income class (19.4 percent) and smallest (3.4 percent) in the highest stratum. This tax legislation lessened the progressivity of Colorado's tax structure as it had existed for over 20 years. However, one might argue that it was merely a return to the intended progressivity of the 3 percent to 8 percent tax rate structure that was originally passed by the state legislature.

In any case, the tax increase was one which affects the widest constituency possible and raises a relatively large amount of revenue.

C. OTHER TAX REDUCTION MEASURES

Four additional tax law changes have affected the taxable income base, i.e., they have increased deductions from total income or adjusted gross income and thus have the impact of reducing taxable income.

For years, debate has existed over the taxation of interest income and its effect on savings. Beginning in 1980, Colorado has exempted from taxation the first \$200 of interest income per individual to provide some incentive for saving. A similar exemption exists for dividend earnings. This modification reduced tax liability for taxpayers by \$10.9 million in fiscal year 1985. The impacts of this change and others discussed in this section are presented in Table III-7.

Colorado allows taxpayers to itemize their deductions on the state tax return even if they did not do so on the federal return. A large difference between the state standard deduction (\$1,420) and the federal zero bracket amount (\$2,300 for single taxpayers and \$3,400 for married taxpayers) prompted this change. This benefit reduced tax liabilities by \$2.0 million for an estimated 47,000 taxpayers.

A low income allowance was built into Colorado's standard deduction prior to 1980. This had the impact of limiting the standard deduction for many taxpayers below the \$1,000 maximum. Repeal of the low income allowance feature gave a fixed standard deduction to all taxpayers using this deduction. Colorado's taxpayers benefited by \$7.5 million from this feature.

Colorado's basic personal exemption was raised to \$850 from \$750 effective with the 1978 tax year. Taxpayer's gained \$22.7 million from this feature in fiscal year 1985.

a/ "Colorado Income" differs from Colorado adjusted gross income due to: 1) Federal adjustments as sick pay; 2) Colorado modifications such as tax exempt interest; and 3) the treatment of negative income as zero for Colorado adjusted gross income.

b/ Property income consists of interest, dividends, capital gains, rents, royalties, annuities and pension income, and partnership income.

a/ Includes cities with less than 20,000 population and rural areas.

APPENDIX: DESCRIPTION AND LIMITATIONS OF
STATISTICAL SAMPLE

This study was based on a sample of tax returns filed during fiscal year 1985. Tax returns within the scope of the study consisted primarily of 1984 returns but did contain approximately 1,500 returns from the 1983 tax year.

The study focused on the distribution of income and tax liability by income size and major planning region of the state. Therefore, a stratified random sample was designed consisting of 13 income strata and 15 geographic regions. The number of regions include the 13 major planning regions as defined by the Colorado Department of Local Affairs and two additional regions for the purpose of categorizing returns with out-of-state addresses.

Sampling ratios ranged from 1:1 to 1:546. As income levels increase, the sampling rate increases and a tax return is more likely to be included within the sample. The data base in fiscal year 1985 consisted of 18,408 tax returns.

Table A-1 presents the sample size, estimated number of returns in the universe, and the statistical reliability of adjusted gross income and net normal tax by income class. For example, the sampling error (expressed as the standard error of the mean divided by the mean) in the \$20,000 to \$25,000 income class was 51/100 of one percent. The implications of this accuracy level are that there is a 95% probability that the estimated total adjusted gross income of \$2,670 billion in this income class would not differ by more than 1.0 percent in either direction. The 95 percent confidence interval around the sample value would be \$27 million in either direction.

Table A-2 presents the sample size, estimated number of returns in the universe, and the statistical reliability of adjusted gross income and net normal tax for the major planning regions. The same statistical inferences as discussed above may also be applied to this table.

The overall sampling error for adjusted gross income was 9/100 of one percent and for net normal tax was 40/100 of one percent. The 95 percent confidence intervals around the sample values for adjusted gross income and net normal tax are \$51.4 million and \$6.5 million, respectively.

The sample data were carefully controlled with a series of programmed computer checks to eliminate taxpayer and transcriber errors. As a result, it is felt that a complete tabulation of all tax returns would not yield significantly better data.

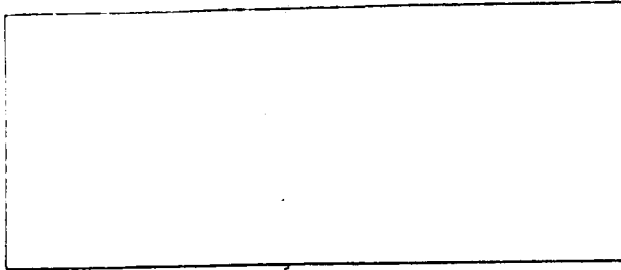

TABLE A-1. STATISTICAL RELIABILITY OF THE COLORADO INDIVIDUAL INCOME TAX SAMPLE
Fiscal Year 1985

Adjusted Gross Income Classes	Number in Sample	Number of Returns	Estimated Number and Dollar Amounts			
			Adjusted Gross Income		Net Normal Tax Liability	
			Dollar Amount (\$000)	Sampling Error (Percent)	Dollar Amount (\$000)	Sampling Error (Percent)
Under \$ 3,000	1,224	220,394	\$ 254,837	1.10	\$ 824	7.30
\$ 3,000 - \$ 5,000	600	109,320	426,753	1.57	3,078	1.98
\$ 5,000 - \$ 10,000	1,301	216,739	1,597,842	0.72	23,207	2.99
\$ 10,000 - \$ 15,000	1,165	177,355	2,209,562	1.15	45,137	4.27
\$ 15,000 - \$ 20,000	1,340	145,177	2,533,509	0.18	61,205	0.94
\$ 20,000 - \$ 25,000	1,401	119,071	2,669,827	0.51	70,456	1.39
\$ 25,000 - \$ 35,000	2,662	186,105	5,494,258	0.11	156,572	1.45
\$ 35,000 - \$ 50,000	2,701	155,377	6,448,565	0.26	195,765	0.61
\$ 50,000 - \$100,000	2,445	87,351	5,548,419	0.44	184,949	0.25
\$100,000 and over	3,569	13,787	2,769,007	0.83	96,806	1.16
TOTAL	18,408	1,430,676	\$29,952,580	0.09	\$838,000	0.40

TABLE A-2. STATISTICAL RELIABILITY OF THE COLORADO INDIVIDUAL INCOME TAX SAMPLE
BY MAJOR PLANNING REGION ^{a/}
Fiscal Year 1985

Major Planning Regions	Number in Sample	Number of Returns	Estimated Number and Dollar Amounts			
			Adjusted Gross Income		Net Normal Tax	
			Dollar Amount (\$000)	Sampling Error (Percent)	Dollar Amount (\$000)	Sampling Error (Percent)
1 - South Platte Valley	607	27,116	\$ 454,886	2.28	\$ 12,249	1.46
2 - Northern Front Range	1,789	117,035	2,277,730	0.40	60,428	0.59
3 - Denver Metropolitan	5,703	800,661	19,132,946	0.04	552,075	0.39
4 - Pikes Peak	1,169	140,689	2,767,676	1.07	71,553	2.55
5 - High Plains	1,027	8,988	164,225	0.17	4,467	1.53
6 - Lower Arkansas Valley	636	19,421	290,890	1.52	7,872	3.10
7 - Spanish Peaks	955	54,744	845,474	0.56	22,362	1.18
8 - San Luis Valley	730	14,333	189,661	0.88	4,701	2.12
9 - San Juan Basin	766	21,009	344,514	1.76	8,271	1.98
10 - Black Canyon	1,017	24,683	353,864	1.16	8,472	0.59
11 - Plateau	1,066	51,322	960,372	0.88	25,506	1.24
12 - Northern Mountain	783	30,471	641,418	1.22	18,123	0.64
13 - Upper Arkansas Valley	620	19,088	289,999	0.60	7,359	2.69
Out-of-State	641	70,715	969,430	1.91	25,370	1.76
Non-Resident	899	30,401	269,492	4.81	9,193	4.40
Total	18,408	1,430,676	\$29,952,580	0.09	\$838,000	0.40

^{a/} See Table 22 for counties within each planning region.
