Scope of Corporate Income Tax Study

This report is based on Colorado Corporate income tax returns processed by the Department of Revenue during the fiscal year July 1, 1985 through June 30, 1986. Detailed statistical tables are presented for returns which have some form of economic activity in Colorado. They are classified by type, income stratum, tax liability, domicile, scope of market (intrastate and interstate), method of income apportionment, asset size and major industry category. Previous studies of this type were conducted in 1975, 1981, 1983, 1984 and 1985 ^{1/}.

Number and Type of Returns

The sample survey for this study indicates that 53,806 returns were processed during the fiscal year July 1, 1985 through June 30, 1986 by the Department of Revenue.

Table A

Number and Type of Colorado Income Tax Returns

<u>Corporations Required to File</u>	<u>Number of Returns</u>	<u>Percent Distribution</u>
<u>Subject to Tax</u>		
Taxable	21,225	39.45

DISC <u>a/</u> & Investment Trusts	<u>121</u>	<u>.22</u>
Total	<u>10,821</u>	<u>20.11</u>
Total Returns Filed	53,806	100.00

a/ Domestic International Sales Corporation

Basically there are two types of corporate returns filed with the Department. Corporations subject to tax are those with some form of economic activity within the state and are not tax exempt by statute. The corporations not subject to tax represent firms that were inactive or not operating during the tax year, non-profit or charitable organizations and small business corporations (Subchapter S Corporations) which elected to be taxed through their shareholders under the state individual income tax. Corporations not subject to tax are excluded from the detailed statistical tables and analysis presented in the remainder of this report.

The number of returns does not necessarily represent the total number of corporations. The tax laws permit a parent corporation to file a single consolidated return for an affiliated group of corporations. Also it is

possible that a particular corporation filed more than one return during the fiscal year. For example, firms electing to change their accounting periods are required to file a return for the short period between the close of the original tax year and the beginning of the new one. A firm also may have filed two returns during the same period if an earlier return was received as the result of filing an extension beyond the normal due date when the later return was filed without such an extension. In either case, there is not a duplication of tax data since the returns cover different time periods. The number of non-tax returns and the number of returns not subject to tax fluctuates on a state fiscal year to fiscal year basis partly due to Revenue Department processing patterns.

In fiscal 1985/86 the 42,985 returns subject to tax represented over three-fourths of all the returns processed. Out of this total, 21,225 or 49% were taxable returns, i.e. reported some amount of positive Colorado taxable income (profit) and therefore incurred an income tax liability, and 51% were non-taxable returns with either zero or negative Colorado taxable income (loss) or a Colorado operating loss carryover which equaled or exceeded their taxable income.

Accounting Periods

The accounting periods covered by the corporations tabulated in this report are based on either the calendar year or the tax year used by the firm for federal and state income tax purposes. Table B shows the distribution of the returns and tax liability before tax credits classified by the month in which the corporations' accounting period ended.

Table B

Tax Credits

The income tax credits claimed on the returns covered in this report are the new business facilities credit, the inventory property tax credit, the investment tax credit and the commercial energy credit. Other credits, which were not significant in amount, include an impact assistance credit, a crop-livestock credit and a trash hauling certificate credit 2/. With the exception of the investment tax credit and the commercial energy credit, the credits claimed represent, for the most part, carry-over amounts as all such credits have expired. Table C shows the number of returns which claimed tax credits and the amount of credit by type of tax credit.

Table C

Number and Type of Income Tax Credits

Total		<u>100.0</u>		<u>100.0</u>

** Less than 0.1 percent.

a/ Tax from recomputing prior year investment credit.

The most important of the tax credits, both in number of returns and dollar amount of credit has been and is the investment tax credit which was utilized by over one-fourth of all returns subject to tax and over half of the taxable returns. This credit accounted for over four-fifths of the total amount of credits claimed.

The other major credits have been specific purpose credits limited in scope and were not as widely used. The new business facility credit was claimed on 454 returns or by 1.1 percent of all returns, the commercial energy credit was used by 80 firms or nearly 0.2 percent of total returns.

The combined credits claimed amounted to nearly \$18 million and represented a tax saving equivalent to 14 percent of the total tax liability. Utilizing the investment tax recapture (based on recomputing prior year investment credit) as a negative credit reduces the total credits claimed to \$16.7 million for a 13 percent reduction in tax liability.

Tax Rates

The corporations covered by this report were taxed at the rate of 5 percent on net income derived from Colorado sources.

Table D shows a comparison of the maximum corporate income tax rates in use by the various states. As shown in this table, 5 states imposed no corporate income tax and one state had a lower rate than Colorado. Five other states had rates the same as Colorado and 39 states, including the District of Columbia, had a maximum rate higher than Colorado.

Corporation Income Tax Trends

Table E shows the trend in corporate income tax liability and cash collections from fiscal 1979, when income tax credits were first instituted, through fiscal 1986. In the absence of such credits, Colorado corporate income tax liability would have increased since 1979 from \$91.9 million to \$128.1 million in fiscal 1986 for an average annual growth rate of 4.8%. After tax credits, the tax liability rose from \$91.9 million in 1979 to \$111.4 million in 1986 for an average annual rate of 2.8%. Cash collections, on the other hand, decreased from \$117 million to \$112.2 million over the same time period.

Table F portrays the trend of corporate tax revenue on a cash collections basis, which reflects cash paid with returns, estimated tax payments, audit and account payments and refunds due to overpayments.

<u>Fiscal Years Ended June 30</u>	<u>New Business Facilities ^{1/}</u>	<u>Investment Credit ^{2/}</u>	<u>Inventory Credit ^{3/}</u>	<u>Pollution Control ^{4/}</u>	<u>Commercial Energy ^{5/}</u>	<u>Total Credits</u>
A. Dollar Amounts in Millions						
1979	*					*
1980	.3	1.9	.3	.4		2.9
1981	.6	13.0	2.5	.4		16.5
1982	1.3	26.1 ^{6/}	6.0	1.0	.2	34.6
1983	1.0	23.4 ^{6/}	10.5	1.3	.5	36.7
1984	1.2	11.6 ^{6/}	11.2	1.1	.5	25.6
1985	2.1	13.1 ^{6/}	12.2	.1	1.0	28.5
1986	1.8	14.3 ^{6/}	.3	.0	.3	16.7

* \$25,000

^{1/} \$50 for each new business facility employee and \$50 for each \$100,000 of new business facility investment located in a county with more than 50,000 population. If new business facility is located in county with less than 50,000 population, the credit amounts become \$100.

^{2/} Investment tax credit is percentage of federal investment credit. 10% for 1979 returns, 25% for 1980 returns, 15% for 1981 returns, 10% for 1982 returns and after.

^{3/} Tax credit for a percentage of property tax paid on inventories. 20% for 1979 returns, 40% for 1980 returns, 60% for 1981 returns, 80% for 1982 returns and 100% for 1983 returns.

^{4/} 30% of amount of property tax paid on pollution control property.

^{5/} 10% of expenditures for energy conservation and 30% for renewable energy property expenditures made during tax years 1981 through 1986.

^{6/} Net of investment credit recapture of \$.2 million in fiscal 1982, \$.8 million in fiscal 1983 and \$.9 million in fiscal 1984, \$1.0 million in fiscal 1985 and \$1.2 million in fiscal 1986.

Table G presents the trend of the various tax credits by type of credit since their inception. The most significant increases occurred in the investment credit which rose from \$1.9 million in fiscal 1980 to a high of \$26.1 million in fiscal 1982 and to \$14.3 million in fiscal 1986 and in the inventory credit which increased from \$.3 million in fiscal 1980 to \$12.2 million by fiscal 1985. These amounts represent some normal growth but to a large extent are due to changes in the percentages of credit allowed and to the time period in which the tax returns are received.

Intrastate and Interstate Firms

Corporations doing business in other states as well as Colorado are classified as interstate corporations and as such generally determine their Colorado taxable income by apportioning part of their federal taxable income to Colorado by using either the two-factor or three-factor formula required by statute, or by some specific allocation method approved by the Executive Director of Revenue ^{3/}. Corporations which do not qualify for income apportionment are classified as intrastate corporations. Table H-1 shows the distribution of intrastate corporations and interstate corporations by the apportionment method. Table H-2 shows the distribution of the tax credits by type of credit on the same basis.

While the intrastate firms represent nearly four-fifths of the returns filed, they account for only about one-third of the total tax liability and one-fifth of the tax credits. Conversely, the interstate firms while representing only about one-fifth of the total number of firms, accounted for two-thirds of the total tax liability and four-fifths of the tax credits.

Domestic and Foreign Firms

For purposes of this report, a corporation was classified as domestic firm if the home office of the corporation was located within Colorado; those located outside Colorado were considered to be foreign corporations. When the returns are classified on this basis, the distribution roughly parallels that of the intrastate-interstate classification. For example, 94% of all domestic returns were intrastate firms and conversely 77% of all foreign returns were interstate firms. The distribution of the domestic and foreign returns by intrastate and interstate activity is presented in Table I-1. Table I-2 details the tax credits by this same classification.

Distribution by Industry

Tables J-1 and J-2 are distributions on the basis of major standard industrial classification codes (SIC). Service industries, including wholesale and retail trade, continue to account for over two-thirds of the returns and two-fifths of the total tax liability. The agricultural sector remains the least significant class representing less than 3% of the returns and a little over 1% of the tax. The manufacturing group accounts for over 9% of the returns but over one-fourth of the tax and an equal portion of the tax credits.

Distribution by Asset Size

Asset sizes of corporations are based on the total assets for the firm's overall operations reported by them on their income tax returns. Tables K-1 and K-2 provide a distribution by broad asset classes of all returns subject to tax, both taxable and nontaxable, and give some indication of the relative significance of the various sized firms operating in Colorado.

^{a/} Sum of items may not equal total because of rounding.

^{b/} Total may exceed the number of firms claiming credits since some taxpayers claimed more than one type of credit.

As might be expected, the largest number of returns was filed by relatively small firms, those with assets of less than \$100,000. As a group they represented over two-fifths of the returns but only about 6% of the total tax liability. In contrast, the largest firms, those with assets of \$100 million or more, while representing only about 4% of the returns but accounted for nearly one-half the total tax liability and for almost two-thirds of the tax credits. On a larger scale, if corporations with assets of \$1 million or more are considered to be fairly large, such corporations represented less than one-fourth of the firms doing business in Colorado but were responsible for over four-fifths of the total tax liability and tax credits. Conversely, small and medium sized firms, those with assets less than \$1 million, accounted for three-fourths of the returns but as a group were liable for less than one-fifth of the state tax and received about one-tenth of the tax credits.

Distribution of Returns by Taxable Income Classes

Ten Colorado taxable income classes as shown on Tables L-1 and L-2 are used in this report. One class is for nontax returns and nine are used to distribute the taxable returns. When the returns are classified by taxable income categories, it is clearly evident that a vast majority of corporations account for a very small portion of the state corporate income tax. Conversely, the major portion of the tax revenues are generated by a relatively small number of large corporations. The utilization of the tax credits follows the same distributional pattern.

As shown in Table L-1, the nontaxable returns accounted for nearly one-half of all returns processed during the fiscal year. Among the taxable firms, nearly two-thirds of the corporations reported taxable profits less

than \$25,000 and accounted for only 4% of the tax liability and less than 5% of the tax credits. In contrast, the firms in the highest classification with taxable incomes of \$500,000 or more represented less than 3% of the returns but were responsible for over 70% of the total tax liability and nearly three-fourths of the tax credits.

Distribution of Returns by Income and Asset Size

Tables M and N present a distribution of returns cross-classified by income classes and asset size and by income classes and major industry group. As might be expected, there is a marked correlation between size of income and asset size. In the nontax and the two lower strata of the taxable returns, more than half of the returns were small firms with assets less than \$100,000. In the next four income classes the majority of returns were filed by medium size firms with assets of \$100,000 to \$1 million, and in the top three income classes the majority of returns were by large firms. These relationships are similar to those of the previous studies.

As a further indication that the Colorado economy is service oriented, the number of service industry firms dominate every taxable income class. For example, at income levels below \$50,000 the service categories represented approximately two-thirds of the returns. In the largest taxable class, service oriented firms constituted almost one-half of the returns. In contrast, the agricultural and mining categories continue quantitatively to be the least important in almost all categories. Construction, transportation and utilities as a group and manufacturing have retained the same relative position over the past few years at about 15% and 9% of the returns respectively.

Table O separately classifies intrastate and interstate by taxable income classes. The distribution is somewhat different for the two groups. For example, the intrastate firms with taxable income less than \$50,000 accounted for almost four-fifths of the taxable returns and about one-fifth of the tax liability, whereas the interstate firms represented nearly two-thirds of the returns but less than 2% of the tax liability. At the other end of the scale, only about 1% of the intrastate firms had taxable incomes of \$500,000 or more and accounted for almost two-fifths of the tax while over 10% of the interstate returns were in the top category and represented well over four-fifths of the interstate tax.

Apportionment of Federal Taxable Income

Table P compares the tax distribution of the interstate firms using the Colorado two-factor formula with those using the multistate compact three-factor formula for apportioning federal taxable income to Colorado.

While the number of firms using the two-factor formula was less than one-half of the formula returns, their tax liability of \$46.9 million represented nearly three-fifths of the total tax. On the other hand, the firms using the three-factor formula while representing over one-half of the returns had a tax liability of \$33.0 million or two-fifths of the tax. Among the taxable firms using the two-factor formula over two-thirds of the returns were in the four lowest taxable income classes (less than \$50,000) but accounted for less than 2% of the tax liability. Conversely the top 9% of the firms in the highest taxable income class (\$500,000 and over) were responsible for over ninety percent of the tax liability for two-factor firms.

** Less than 0.1 percent.

In the case of the three-factor firms, the top 10% of the firms accounted for almost four-fifths of the tax liability, and the three-fifths of the returns with less than \$50,000 taxable income accounted for less than 3% of the multistate three-factor tax liability.

Table Q shows the relative significance of the revenue, property and payroll factors in the apportionment of modified federal taxable income to Colorado by firms using either the Colorado two-factor formula or the multistate compact three-factor formula. For the taxable firms using the two-factor formula the property factor was significantly more important than the revenue factor accounting for nearly three-fifths of the apportioned federal income while the latter represented two-fifths. This ratio is similar to that found in the prior studies. For taxable firms using the three-factor formula, the revenue factor was of greater importance accounting for approximately two-fifths of the apportioned income while the property and payroll factors accounted for roughly one-third each. On a combined weighted basis the property factor was the most significant and the payroll factor quantitatively the least important.

With regard to the nontaxable two-factor firms, the revenue factor remained somewhat more important accounting for more than half of the apportioned income. In the case of the multistate nontaxable firms, the revenue factor was the most significant representing almost two-fifths of the factors. On a combined basis, the revenue factor was the most dominate while the payroll factor, again was the least important in the apportionment of income. The property factor was twice as significant as the payroll factor.

Derivation of Taxable Income

The derivation of Colorado taxable income is presented in Table R ^{3/}. Firms with positive Colorado taxable income reported federal taxable income (profits) of \$135.8 billion on their overall company operations. After adjustments for differences between federal and state tax law this income was reduced to \$114.1 billion. Interstate firms accounted for over 99% of these modified profits.

The income apportioned and allocated to Colorado by the interstate firms amounted to \$1.8 billion or less than 2% of their total modified federal income. The intrastate firms reported \$870 million of modified federal taxable income which is the same as the income reported to Colorado. This represents about 48% of the amount reported by the interstate firms. The total taxable income subject to Colorado tax, adjusted for operating loss deductions of \$120 million from previous years, amounted to nearly \$2.6 billion or slightly less than 2% of the total federal taxable income on all taxable returns.

The nontaxable returns, on the other hand, reported negative federal taxable income of nearly \$90.9 billion which when modified for tax code differences resulted in losses of \$63.2 billion. Nearly 97% of this negative federal taxable income was accounted for by interstate firms which attributed \$1.4 billion or 2.3% of their losses to Colorado. For the intrastate firms, the Colorado losses amounted to \$2.1 billion or 2.5 times greater than that reported by the interstate firms.

The nontaxable firms also reported Colorado operating loss carryovers of \$3.0 billion resulting in a total negative Colorado taxable incomes of \$6.6 billion, an amount slightly over 7% of their total negative federal taxable income.

APPENDIX A

SUMMARY OF PROVISIONS OF THE COLORADO CORPORATE INCOME TAX

The Colorado corporate income tax is the result of the application of the corporate tax rates to Colorado net corporate income. Colorado net corporate income is the federal taxable income plus or minus certain modifications and, in the case of a corporation doing interstate business, after apportionment and allocation under provisions of either the Colorado Income Tax Act ^{1/} or the Multistate Tax Compact ^{2/}.

Filing Requirements

Every corporation, including Subchapter S corporations, doing business in Colorado or deriving income from Colorado sources is liable for filing corporation income tax returns with Colorado. Corporations which are exempt from filing federal income tax returns are also exempt from filing Colorado income tax returns. Insurance companies which are subject to the tax imposed on gross premiums ^{3/} are also exempt from the Colorado income tax.

Accounting Periods and Method

The corporation's accounting periods and method of reporting for Colorado income tax purposes must be the same as for federal income tax purposes.

Modifications of Federal Taxable Income

There are several modifications which increase federal taxable income for the purpose of computing state corporate income taxes. These include (1) the addition of municipal bond interest which is not specifically exempt from Colorado tax, (2) any federal net operating loss deduction claimed in computing federal taxable income, (3) the amount of any Colorado income tax

deducted, (4) depreciation claimed with respect to alternative energy devices if the cost of such devices is being claimed as a modification decreasing federal taxable income, and (5) amounts claimed for the pollution control property tax credit.

Modifications decreasing federal taxable income are (1) federal bond interest, (2) Colorado income tax refunds, (3) any amount included in federal taxable income by reason of the gross-up provisions of Section 78 of the Internal Revenue Code, (4) the cost of alternate energy devices, (5) any salary or wage expense not allowed as a deduction on the federal return per Section 280C of the Internal Revenue Code (relating to the federal new jobs credit), (6) the federal work incentive credit and the federal targeted jobs credit, (7) amounts not deducted in determining federal taxable income for free or subsidized ride sharing or mass transit arrangements, and (8) other miscellaneous differences such as percentage depletion on oil shale.

Modified Federal Taxable Income

After federal taxable income has been adjusted by the above modifications, the resulting amount is classified as "modified federal taxable income." The "modified federal taxable income" is the Colorado taxable income for those intrastate corporations not apportioning income, and it becomes the base for the apportionment of income by interstate corporations.

Apportionment of Income

Corporations doing business in more than one state may elect each year to apportion income either under the Colorado Income Tax Act or the Multistate Compact. Other apportionment methods are allowed with the approval of the executive director of the Revenue Department. For the purpose of apportioning income, "doing business" in a state is defined for Colorado income tax

purposes as having income arising from the activity of one or more employees located in that state or arising from the fact that real or tangible personal property is located in that state for business purposes. This definition applies equally in determining when a Colorado corporation is doing business outside of Colorado or when a foreign corporation is doing business in Colorado. The multistate compact provided that a corporation is deemed to be doing business in another state if that state has the authority to subject the corporation to an income tax or equivalent tax. These definitions of "doing business" in a state have been somewhat restricted by federal law ^{4/}.

A 1980 court case ^{5/} held that the Colorado corporate income statutes provide for the distribution and allocation of income and deductions by use of a combined report in order to ascertain the income attributable to an in-state business activity of the corporation involved in a unitary business operation, (i.e., when that portion of the business operation within Colorado is dependent upon or contributes to the operation of the business outside the state).

Effective January 1, 1986 the application of the unitary method will change ^{6/} whereby the executive director shall not require the inclusion of the income of any corporation which conducts business outside the United States if 80% or more of the corporation's property and payroll are assigned to locations outside the U.S. Dividends which are received from a corporation which would be includible in a combined report shall be excluded from taxable income. Foreign source income shall be considered if the corporation elects to claim foreign taxes as a deduction. If, for federal tax purposes, the taxpayer elects to claim foreign taxes as a credit, foreign source income

shall be considered subject to a reduction in foreign income proportionate to the ratio of foreign taxes paid to the U.S. tax at 46% on that same income.

In the case of an affiliated group of corporations, the executive director may require a combined report for those members of an affiliated group which meet any three of the following conditions for the tax year and two preceding tax years.

- 1) At least 50% of the gross operating receipts constitute inter-company sales among other corporations in the group or at least 50% of the operating expenditures of one corporation involve purchases or leases from another corporation in the group.
- 2) At least 50% of 5 or more key services (public relations, accounting, legal, personnel, etc.) are provided by corporations in the group.
- 3) At least 20% of the long term debt is owed to another corporation in the group.
- 4) A corporation uses to a substantial extent, the patents, trademarks, proprietary materials, etc. owned by another corporation in the group.
- 5) At least 50% of the members of the board of directors are members of the board or officers of another corporation in the group.
- 6) At least 25% of the highest ranked officers are members of the board or officers of another corporation in the group.
- 7) Also provided for is the exclusion of intercompany transactions among affiliated corporations from the numerator and denominator of the apportionment factor and defines the numerator to be the sum of the revenue, property and payroll factors of those affiliated corporations subject to Colorado tax.

Apportionment Under the Colorado Income Tax Act

This method of apportioning income provides for a two-factor formula: a revenue factor and a property factor. The modified federal taxable income subject to apportionment is multiplied by the average of the revenue factor and the property factor.

Revenue Factor. The revenue or sales factor is a fraction whose numerator consists of the total gross receipts assignable to Colorado and the denominator is the entire gross receipts from all sources. The gross receipts assignable to Colorado consists of sales of goods, merchandise or property which are ultimately delivered in Colorado. Included as Colorado revenue are rents and royalties from real and tangible personal property located in Colorado, revenue from services rendered in Colorado, and gross proceeds from the sale of real and tangible personal property located in Colorado. Also included, if the corporation's commercial domicile is in Colorado, are dividend income, interest income, gains from the sale of intangible personal property, and patent and copyright royalties if the accounting procedures do not reflect the state of utilization of patent and copyright royalties.

Property Factor. The property factor is a fraction in which the numerator is the average value of the corporation's real and tangible personal property owned or rented in Colorado and the denominator is the average value of all the corporation's real and tangible personal property owned or rented. Property value is the average of the amounts at the beginning of the taxable year and the ending of the taxable year. Corporations may elect to value all property owned by the corporation at cost or at its adjusted basis for federal income tax purposes. Real property rented by the corporation is valued at eight times the net annual rent and tangible personal property is valued at

three times the net annual rent. Net annual rent is the annual rent paid by the corporation less any annual rent received by the corporation from subrentals.

~~Apportionment Under the~~ Multistate Compact

This method of apportioning income provides for a three-factor formula: a revenue factor, a property factor, and a payroll factor. Public utilities and finance companies are not permitted to apportion income under provisions of the multistate compact. The modified federal taxable income subject to apportionment is multiplied by the average of the sum of the revenue, property and payroll factors to determine the total income apportioned to Colorado. Income which is directly allocated to Colorado is added to the income apportioned to Colorado to derive the Colorado taxable income.

Business and Nonbusiness Income. In order to determine the Colorado taxable income under the multistate compact, the various sources of income must be classified as either business or nonbusiness. Business income is defined as income arising from transactions and activities in the the regular course of the corporation's trade or business. Nonbusiness income is all income other than business income (eg, dividends, rents and royalties).

Allocation of Income. Only that income which is classified as nonbusiness income by the multistate compact is subject to allocation. The directly allocated income in the form of interest and dividends less directly or indirectly related expenses are allocated to that state where the principal place of business of the corporation is located. The nonbusiness income in the form of net rents, royalties and capital gains are allocated to the state where such property is located. Nonbusiness income from patents and copyrights are allocated to the state where utilized or, if accounting

procedures do not reflect the state of utilization, to the state in which the corporation's commercial domicile is located.

Modified Federal Taxable Income Subject to Apportionment. All nonbusiness income less related expenses is subtracted from the modified federal taxable income if the corporation qualifies and elects to apportion income under the multistate compact. The result is the modified federal taxable income subject to apportionment.

Revenue Factor. The revenue factor is the same as under the two-factor formula except that the definition of sales varies somewhat. Sales are defined as all gross receipts of the corporation not directly allocated. Sales of tangible personal property are Colorado sales if the property is delivered or shipped to a purchaser within Colorado other than the U.S. government regardless of F.O.B. point, or other condition of sale, or the property is shipped from Colorado to the U.S. government, or if the corporation is not taxable in the state of the purchaser. Sales other than tangible personal property are Colorado sales if the income producing activity is performed in Colorado or if a greater proportion of the income producing activity is performed in Colorado based on costs of performance.

Property Factor. The property factor is the same as under the two-factor formula, except that rented tangible personal property is valued at eight times the net annual rent, and owned property must be valued at cost.

Payroll Factor. The payroll factor is a fraction, the numerator of which is the total compensation paid in Colorado during the tax period by the corporation and the denominator is the total compensation paid everywhere during the tax period. Compensation means wages, salaries, commissions and any other form or remuneration paid to employees for personal services.

Compensation is Colorado compensation if the individual's service is performed entirely within Colorado or if the service outside Colorado is incidental to that performed in this state and (1) the base of operations or control is in Colorado, or (2) the base of operation or control is not in any particular state but the individual's residence is in Colorado.

Other Apportionment Methods

Multistate Compact Option. If a corporation's activities in Colorado consist of selling and the corporation neither owns nor rents real or tangible personal property in Colorado, and if the gross sales in Colorado during the taxable year are \$100,000 or less, the corporation may elect to pay a Colorado tax computed on gross sales. The tax rate is 1/2 of 1% of the gross receipts from Colorado sales.

Special Methods. Where the allocation provided by the Colorado income tax act or the multistate compact does not clearly reflect Colorado income or is not realistic as compared to the net income of the corporation as a whole, the corporation, with approval of the executive director of the revenue department, may adopt some other method.

Colorado Taxable Income

The Colorado taxable income is that amount computed after adjusting for tax law modifications and allocation and apportionment methods if applicable. This is the amount which is subject to the income tax unless a Colorado net operating loss deduction is claimed.

The Colorado net operating loss deduction is computed in the same manner as the federal net operating loss deduction except that in the case of a corporation apportioning income, it is that part of the federal net operating loss, as modified, from Colorado sources. The Colorado net operating loss may

be carried forward for the same number of years as a federal loss 7/. The Colorado taxable income is reduced by any Colorado net operating loss deduction before the Colorado tax is computed.

Rates of Tax

With the exception of corporations eligible and electing to file under the Multistate Compact option (see Other Apportionment Methods, Multistate Compact Option on preceding page), every group, person or organization considered to be or taxed as a corporation for federal income tax purposes shall be a corporation for Colorado income tax purposes. A tax is levied for each taxable year on each corporation doing business in Colorado on its net income from Colorado sources at rates as specified in the following tables.

(a) For taxable years beginning on or after January 1, 1981 but before January 1, 1982 the tax rate was 5% subject to the following reduction:

<u>Taxable Income</u>		<u>Statutory Reduction</u>
<u>Over</u>	<u>But Not Over</u>	
\$ 0	\$25,000	1%
\$25,000	\$50,000	\$250 plus 1/2% of excess over \$25,000
\$50,000		\$375

The tax rate and reduction translates into tax rates as follows:

<u>Taxable Income</u>		<u>Tax</u>
<u>Over</u>	<u>But Not Over</u>	
\$ 0	\$ 25,000	4%
\$25,000	\$ 50,000	\$1,000 plus 4 1/2% of excess over \$25,000
\$50,000		\$2,125 plus 5% of excess over \$50,000

(b) For taxable years beginning on or after January 1, 1982 but before January 1, 1983 the tax rate was 5% subject to the following reduction:

<u>Taxable Income</u>		<u>Statutory Reduction</u>
Over	But Not Over	
\$ 0	\$ 25,000	1%
\$25,000	\$ 75,000	\$250 plus 1/2% of excess over \$25,000
\$75,000		\$500

The tax rate and reduction translates into tax rates as follows:

<u>Taxable Income</u>		<u>Tax</u>
Over	But Not Over	
\$ 0	\$ 25,000	4%
\$25,000	\$ 75,000	\$1,000 plus 4 1/2% of excess over \$25,000
\$75,000		\$3,250 plus 5% of excess over \$75,000

(c) For taxable years beginning on or after January 1, 1983 but before July 1, 1986 the rate was 5%.

(d) For taxable years beginning on or after January 1, 1986 but before July 1, 1987 the rate will be 6% subject to the following reduction:

<u>Taxable Income</u>		<u>Statutory Reduction</u>
Over	But Not Over	
\$ 0	\$ 50,000	.75%
\$ 50,000	\$200,000	\$375 plus .5% of excess over \$50,000
\$200,000		\$1,125

The tax rate and reduction translates into tax rates as follows:

<u>Taxable Income</u>		<u>Tax</u>
Over	But Not Over	
\$ 0	\$ 50,000	5.25%
\$ 50,000	\$200,000	\$2,625 plus 5.5% of excess over \$50,000
\$200,000		\$10,875 plus 6% of excess over \$200,000

Only one application of the rate reduction is allowed for a taxable year in the case of a controlled group of corporations as defined in Section 1563(a) of the Internal Revenue Code filing separate Colorado income tax returns. The reduction is to be allocated at the election of the group.

Example: Assume the Colorado net incomes of the ABC controlled corporate group for 1987 are as follows:

A Corporation	\$150,000
B Corporation	\$ 50,000
C Corporation	(\$ 90,000)(loss)

The total Colorado net incomes (excluding net losses) of the group is \$200,000 and the net reduction in tax would be \$2,375. The \$2,375 can be claimed by either corporation A or B or divided between them as they elect.

Tax Credits

The tax credits provide a direct offset against tax liability. These are a pollution control property tax credit, a new business facilities credit, an inventory property tax credit, an impact assistance credit, a crop-livestock credit and a trash hauling certificate credit.

Pollution Control Property Tax Credit

The pollution control property tax credit was 30% of the amount of property taxes paid on pollution control property certified as such by the Colorado Department of Health. The credit also applies to payments in lieu of taxes paid in Colorado. The amount of the credit which may be claimed against Colorado income tax is limited to the income tax liability for the tax year reduced by any new business facility credit claimed. The pollution control property tax credit applied to tax years beginning before January 1, 1983 and may be carried forward to the five succeeding tax years.

New Business Facilities Credit

If the new business facility is located in a county with more than 50,000 population, the credit is \$50 for each new business facility employee and \$50 for each \$100,000 of new business facility investment. If the new business facility is located in a county with less than 50,000 population, the credit amounts become \$100 instead of \$50. The total credit is limited to 50% of the tax due on new business facility income.

An expanded business may qualify as a new business facility if the expansion exceeds \$1 million or if the expansion exceeds 100% of its investment in the original facility. To be eligible for the credit, the facility must be acquired on or after July 1, 1978 and prior to December 31, 1983 and may be carried forward for each of the nine succeeding taxable years.

Any taxpayer who establishes a new business facility located in an enterprise zone established under the provisions of 39-30-103 C.R.S. for at least one year shall be allowed, for the first full income tax year while located in such an enterprise zone, a credit or refund against the Colorado income tax of five hundred dollars for each new business facility employee who is working within the zone. This credit shall be in lieu of any other new business facility credit.

Inventory Property Tax Credit

For taxable years beginning on or after January 1, 1979, taxpayers are allowed a refundable credit in an amount equivalent to a percentage of the general property tax paid to a political subdivision of Colorado on freeport merchandise, stocks of merchandise and livestock. The percentage of property tax allowed as a credit is 20% for 1979, 40% for 1980, 60% for 1981, 80% for 1982 and 100% for 1983. As a result of a 1982 Constitutional amendment,

inventories and livestock will not be assessed in 1983 and years thereafter for property tax purposes.

Investment Tax Credit

The Colorado investment tax credit for a given year is the sum of the Colorado investment tax credit carried over from preceding taxable years, the investment tax credit for the current taxable year, and the investment tax credit carried back from subsequent tax years. The credits are to be claimed in the order in which they were created with the oldest credit to be claimed first, the second oldest credit to be claimed next, etc.

For taxable years beginning prior to January 1, 1982, the Colorado investment tax credit was a percentage of what the federal investment tax credit would have been had the federal credit been computed in accordance with the provisions of Section 46 of the Internal Revenue Code as such section existed on January 1, 1979. This January 1, 1979 date was removed from the Colorado income tax statute for taxable years beginning on or after January 1, 1982. For these years the Colorado investment tax credit will be based on the federal investment tax credit for the same taxable year.

The Colorado investment tax credit is limited to \$5,000 plus 25% of the amount by which the tax liability exceeds \$5,000, except that for taxable years beginning in 1980 and 1981, the limitation on the credit was \$25,000 plus 70% of the amount by which the tax liability exceeded \$25,000.

Within such limitations, the provisions for Colorado investment tax credit are summarized below:

<u>Taxable Year</u> <u>Beginning In:</u>	<u>Amount of Credits:</u>
1979	10% of the tentative 1979 federal investment tax credit
1980	25% of what 1980 federal investment tax credit would have been under 1/1/79 rules
1981	15% of what 1981 federal investment tax credit would have been under 1/1/79 rules
1982 and later	10% of tentative current year federal investment tax credit

Unused investment tax credits may be carried back for three tax years, but not beyond January 1, 1979, and forward for seven tax years. In the case of a controlled group of corporations, the limitation amounts shall be apportioned among the members of the controlled group.

Investment Tax Credit Recapture

For any income tax year beginning on or after January 1, 1979, if any corporation is required to redetermine the credit allowed by Section 38 of the Internal Revenue Code due to the provisions of Section 47 of such code, such corporation must redetermine the Colorado investment credit for the same tax year. With respect to ACRS property acquired during a taxable year beginning on or after January 1, 1982 and prematurely disposed of or reclassified on or after May 26, 1983, the recapture shall be determined in accordance with the recapture percentage table contained in Section 47(a) of the Internal Revenue Code.

If such redetermination results in a reduction of the Colorado investment credit for such year or for any year to which credit was carried, such reduction shall constitute an increase in Colorado income tax for the year during which the disposition or reclassification of the nature of the property

occurs, and the amount of any unused investment tax credit carryback or carryover must be recomputed as appropriate. Such increase in tax shall not be included as tax liability for purposes of computing the limitations on current year credits.

Since the Colorado investment tax credit is based on the federal investment tax credit, the repeal of the federal credit by the Tax Reform Act of 1986 effectively repeals the Colorado credit.

Commercial Energy Credit

The commercial energy credit is a commercial, industrial and agricultural credit equal to 10 percent of expenditures for energy property and thirty percent of expenditures for solar or wind energy property which is located in Colorado during the taxable years 1981 through 1986. Energy property is as defined in Section 48(1)(3) of the Internal Revenue Code of 1954. The maximum expenditure for which credit will be allowed is \$1,250,000 for 1981, \$1,750,000 for 1982, and \$2,250,000 for each of the taxable years 1983, 1984, 1985 and 1986. Energy property consists of such as boilers, burners or other equipment which is designed to use fuel other than oil, natural gas or any product of oil and natural gas.

Impact Assistance Credit

This credit applies to income taxes imposed on income derived from new or expanded mining or milling operations for tax years beginning after January 1, 1981. The credit is equal to contributions made by the corporation prior to commencement of operations to local governments to assist in solving impact problems created by such operation. Each contribution shall be based on an agreement between the taxpayer and the unit of local government and may be

claimed against its income tax liability during the first five years of operation.

Crop-Livestock Credit

A credit is allowed with respect to the value of crops or livestock contributed to charitable organizations during the taxable year. This credit applies to taxable years beginning on or after January 1, 1982 and may not exceed \$1,000 per year. This credit may not exceed any tax liability remaining after previous credits have been claimed. Unused credits may be carried forward as an offset against tax liability for up to five years.

Trash Hauling Certificate Credit

For income tax years beginning on or after January 1, 1980, a credit is allowed based on the acquisition costs of a certificate issued by the public utilities commission for serving the public by hauling waste products or other discarded materials to and from disposal sites if such certificate was acquired from any existing motor vehicle carriers engaged in such business. The amount of the credit for any give tax year shall not exceed one-fifth of the cost of the certificate. The total of such credit shall not exceed \$15,000 per certificate.

APPENDIX B

DESCRIPTION AND LIMITATIONS OF STATISTICAL SAMPLE

This study was based on a sample of Colorado corporate income tax returns processed by the Department of Revenue during the fiscal year July 1, 1985 through June 30, 1986. Amended returns and audit adjustments are not included in the sample. This appendix describes the sampling procedure and indicates the statistical reliability of the sample.

A total of 54,040 corporate income tax returns were processed during fiscal year 1986. Six strata were created based on the amount of state corporate income tax liability and these classes were sampled at rates ranging from one out of every 20 returns in the non-tax group to every return when the total liability exceeded \$10,000. This procedure yielded a sample size of approximately 7,195 returns. Information from each of these returns was transcribed to worksheets, entered onto a computer data file, and verified by a series of edit checks.

The coefficient of variation (standard deviation as a percentage of the mean) is a measure frequently used to judge the accuracy of a sample. The implication of this measure with respect to tax liability is that if one were to take 100 similar samples of these tax returns, in 95 percent of the samples the estimated value of the Colorado tax liability would be within 0.08 percent of the actual value of Colorado tax liability.

Colorado corporate income tax reported to the Department of Revenue amounted to \$133.8 million. The estimate based on this sample was \$128.1 million or a difference of 4.3 percent of the reported value. Table B-1 shows the statistical reliability of Colorado tax liability by each of the six selected tax strata.

TABLE B-1
STATISTICAL RELIABILITY OF THE COLORADO
CORPORATE INCOME TAX BY TAX CLASS

<u>Tax Class</u>	<u>Number In Sample</u>	<u>Coefficient Of Variation</u>	<u>Estimated Tax Liability (\$000)</u>
\$ 0	1,088	0.00	\$ 0
\$ 1 to \$ 500	914	2.58	1,568
\$ 500 to \$ 1,500	875	0.95	4,794
\$1,500 to \$ 3,000	737	0.63	6,241
\$3,000 to \$10,000	1,744	0.50	13,262
Over \$10,000	<u>1,271</u>	<u>0.00</u>	<u>102,271</u>
Total	6,629	0.08	\$128,136

Note: Statistical measures compiled only for corporations subject to tax.
