## INCOME TAXES

### II. Personal

Citation: Title 39, Article 22, C.R.S.

Tax Base: Colorado follows the federal law to determine filing status and federal taxable income. For tax year 1990, the federal personal exemption is \$2,050 and the standard deductions of single and married filing jointly are \$3,250 and \$5,450, respectively. Colorado taxable income is further adjusted by adding or subtracting income from other sources that Colorado has chosen to tax or not tax.

Colorado taxable income is then multiplied by the tax rate to determine the gross tax liability. The allowable tax credits are then subtracted from this amount to determine the net tax liability.

**Present Rates:** 5% "flat tax." Alternative minimum tax (AMT) rate is 3.75%.

**Collection Period:** Due April 15 unless an extension is granted.

**Disposition of Revenue:** (\$1,380.7 M) A share is apportioned to local entities as a method to redistribute cigarette taxes with remainder to general fund.

• Non-game Wildlife Program	1996
• Veterans Memorial Program	1991
• U.S. Olympic Committee Fund	1992
• Homeless Prevention Activities Program Fund	1996

**Federal Income Tax:** Three rates were established under the Federal Tax Reform Act of 1986, the act to be followed in filing personal income taxes for 1990:

Single return	- First \$19,450 -- 15%
	- Over \$19,450 to \$47,050 -- 28%
	- \$47,050 and above -- 33%
Joint return	- First \$32,450 -- 15%
	- Over \$32,450 to \$78,400 -- 28%

For income in federal tax year 1991, the income numbers will be reduced from 33% to 31%.

#### PROPERTY TAX

##### Constitutional and Statutory Citations:

- Article X, Sections 3, 4, 5, 6, 11, and 15, Colorado Constitution
- Title 39, Articles 1 through 13, C.R.S.

A 1982 constitutional amendment requires three methods be used to determine

the actual value (AV) of a property: 1) cost, 2) market, 3) income. The AV is determined for residential property by the cost and market approaches. Agricultural land is based on the earning or productive capacity capitalized at a prescribed rate. The valuation for assessment for producing mines and lands or leaseholds producing oil and gas is determined by a portion of annual production. The amendment also set the rate for the valuation for assessment of residential and all other real property. The General Assembly is required to maintain the same ratio of statewide valuation of residential property in relation to other taxable property whenever a change in the level of value occurs. Exemptions are included in the constitutional amendment.

##### Administration:

The county assessor assesses property except for public utilities and railroads which are assessed at the state level. County commissioners review the valuations to ensure equalization and also hear appeals. The State Board of Equalization reviews and certifies the abstracts which become the basis for the tax roll. The county treasurer collects and disperses the property taxes to all taxing entities.

##### Collections:

The county treasurer mails tax bills after January 1. The taxpayer may make a single payment for the full amount of taxes on April 30. If the property tax bill is over \$25, the taxpayer may make two equal payments, the first due by the last day of February and the second due by July 31.

## Property Valuation:

Property types. Real property is permanently fixed, such as land and buildings. Everything not included within the term real property is considered personal property. Items of personal property -- e.g., household furnishings, freestanding appliances, carpet and drapes -- are subject to taxation only if they are used to produce income, as in a rental unit.

Actual value. The actual value of property reflects the property's worth during a specified period of time. Actual value is determined by the market approach which compares market sales of similar properties, the cost approach which estimates the material and labor costs to replace a similar property, and the income approach which converts income from rent to an estimate of value.

Reassessment cycle. The actual value of property is currently computed based on a two-year reassessment cycle. Property was revalued in 1989, and will be revalued again in 1991. The data gathering period for the 1991 reassessment is the one-and-one-half year period prior to July 1, 1990. Following the 1993 revaluation, reassessments are to occur annually and the data gathering period will advance by one year over that used in the prior year.

Assessed value. The assessed value is equal to the actual value multiplied by the assessment rate. The residential assessment rate for 1991 is 15 percent. Other taxable property is to be valued at 29 percent, except for those classes that are based on production -- oil and gas lands and

leaseholds, producing mines, and agriculture.

Mill. The rate of property taxation for real and personal property is expressed in mills. One mill will generate one dollar of taxes for each \$1,000 of assessed value.

Mill levy. Except for school districts, a taxing jurisdiction's mill levy is determined by dividing the jurisdiction's budget by its total assessed value and then certified by the county commissioners.

Each taxpayer is subject to at least two mill levies -- county and school district. However, there are many variations among mill levies due to the variety of taxing entities including cities, towns, and special districts. A taxpayer's property tax bill is determined by the combined mill levy of all the taxing districts multiplied by the property's assessed value.

Exemptions. Exemptions are listed in Article X of the Colorado Constitution. Section 39-3-101, et seq., C.R.S., further defines the constitutional exemptions.

## Tax Deferrals, Credits, and Abatements:

Tax deferral. Persons 65 years or older may defer payment of taxes for an owner-occupied non-income producing home. The deferral is for one calendar year, but may be continued on an annual basis.

Severance tax credit. Oil and gas companies are allowed a credit against the severance tax equal to a specified percentage of all property taxes paid except those

imposed on equipment and facilities used for production, transportation, and storage.

**Abatements and refunds.** Beginning in 1988, property owners are permitted to protest the value of their property for the prior year as well as the current year. When an error is found in the valuation, the property owner is entitled to a tax abatement or, if the taxes have already been collected, a tax refund.

## SALES AND USE TAXES

**Description of Tax:** Sales and use taxes are levied on the retail sales of tangible personal property and some services. Counties and statutory cities must exempt the same items as the state, except that they may apply sales and use taxes to machinery or machine tools, residential heat and power, and sales of food for off-premise consumption. Home rule cities determine the items subject to their sales and use taxes.

Statutory municipalities and counties may levy a use tax on the storage, use, or consumption of construction and building materials and motor and other vehicles for which registration is required. Home rule cities are required to conform ordinances or procedures to state law in certain areas. The Department of Revenue, upon request, may administer, collect, and distribute the sales tax for counties and municipalities.

Section 29-2-108, C.R.S. limits the total state, county, and municipal sales tax to 7 percent except that the rate may be 8 percent if necessary to allow a county to impose a 1 percent sales tax.

## Tax Rates for Special Purposes

Sales and use taxes are levied for special purposes in numerous areas of the state:

Regional Transportation District (RTD)	0.6%
Cultural Facilities (Same area as RTD)	0.1%
Baseball Stadium (Same area as RTD)	0.1%
County Lodging for Tourist Promotions (Several counties. Tax imposed on lodging only.)	Up to 2.0%
