November 19, 2002

To Members of the Sixty-third General Assembly:

Submitted herewith is the 2002 Capital Development Committee (CDC) Final Report. The purpose of the CDC Final Report is to provide annual and historical information on the capital development process. The 2002 Final Report provides a complete summary of all capital construction and controlled maintenance appropriations during the 2002 session. A five-year history and five-year forecast of capital project funding are also included, as is a description of the cuts to capital projects that took place over the past year. The report concludes with a summary of 2002 legislation, enacted by the General Assembly, that impacts capital development funding or the capital development process, and a description of other action taken by the CDC in FY 2001-02.

The CDC Final Report serves as a permanent record of capital development funding. The report is referred to by CDC staff and other state agencies throughout the year to help facilitate the capital development process. The report also serves as an informational document for any other entity or individual interested in the progress of capital development in the State of Colorado.

Respectfully submitted,

Charles S. Brown
Director
