## Report of the New Courthouse Committee

## REPORT OF THE NEW COURTHOUSE COMMITTEE

**T**HE new courthouse committee of this association makes the following report: That on March 12, 1929, contracts for complete construction of the new courthouse were made as follows:

1. General Complete Contract, including decorations, light fixtures and floor coverings, to Varnum & Bate, of Denver, and Fleisher Engineering & Construction Company, of Chicago.....	\$4,250,000.00
2. Heating and Ventilating to McCarty-Johnson Heating & Engineering Company, of Denver .....	281,425.00
3. Plumbing and Sewerage to Cullyford Plumbing and Heating Company, of Denver.....	52,754.00
4. Electrical Contract to Sturgeon Electric Company, of Denver.....	70,800.00
<b>Total,</b>	<b>\$4,654,979.00</b>

The building is approximately 435 feet by 273 feet, with a full basement, and four complete floors, covering almost the entire block of ground (500 feet by 320 feet) upon which the building is constructed. The approximate height of the entrance portico of the building is ninety feet, equivalent to an ordinary seven-story building. The entrance columns of the front are fifty feet high in the clear.

The building is known as a steel skeleton, with reinforced concrete construction, the entire exterior being of WHITE-WATER LIGHT GRAY GRANITE, quarried near Grand Junction, Colorado, cut and dressed in Denver. This granite is a fine grain texture, slightly lighter than the granite in the State Capitol Building and the new Colorado State Office Building. Sub-contractor's bid on this granite alone is \$1,487,000.00. The estimated time for construction is three years.

The work of construction was begun immediately after the signing of the contract, and is now progressing rapidly.

Respectfully submitted,  
**HARRY C. DAVIS, *Chairman.***
