## *Bar Primary Report*

July 9, 1928

Henry W. Toll, President  
The Denver Bar Association  
Denver, Colorado

Dear Sir:

The Judiciary Committee of The Denver Bar Association begs leave to report that it has conducted a bar primary for the purpose of ascertaining the standing at this Bar of the candidates for the judicial offices to be voted upon at the fall election.

Ballots were sent to all members of

the Association and to all Denver lawyers as well. Five hundred seven lawyers voted with the results shown on the enclosed total sheet.

The primary was held in order that the Republican and Democratic Assemblies to be held in the near future might be advised as to the relative standing at this Bar of the above candidates for the above mentioned judicial offices.

The above named candidates were placed upon the ballot in accordance

with the rules adopted and published prior to the mailing of the ballots.

Several ballots were received with the names of other lawyers written in but such names were necessarily disregarded.

In this primary every lawyer was privileged to vote for one Republican and one Democratic candidate for each judicial office or less if he desired.

No further primary will be held prior to the party assemblies.

Respectfully submitted,

ROBERT E. MORE,

Chairman.

IRA C. ROTHGERBER,

DUDLEY W. STRICKLAND,

LANGDON H. LARWILL,

PLATT ROGERS,

Judiciary Committee.

#### FOR DISTRICT JUDGE

<i>Democrats</i>		<i>Republicans</i>

#### *Half-Truths*

"Half-truths are simple, but the whole truth is the most complicated thing on earth. \* \* \* Talk about the 'survival of the fittest', but they never complete the sentence. It is not the abstractly fittest who survive. The sentence really is, 'the survival of the fittest to survive'; that is the fittest for a given environment. If you cast a minnow and the magnificent bull of Bashan into the Atlantic Ocean, there

is no question which is the nobler organism, the abstractly fittest, but the great bull of Bashan will perish and the minnow will survive in that environment."—*Thos. B. Reed.*

"No man is the wiser for his learning. It may administer matter to work in, or objects to work upon; but wit and wisdom are born with a man."—*John Selden.*
